INSTRUCTION SHEET
STATE PERFORMANCE (TESTING) SKILLS

All basic fire suppression performance testing skills are based on NFPA 1001 Standard for Fire Fighter Professional Qualifications. Each state testing skill will reference the corresponding Job Performance Requirement (JPR) number from NFPA 1001. That JPR is also written in its entirety on the skill sheet. Each gradable step of the skill comes directly from the “Requisite Skills” statements in NFPA 1001, chapters 5 and 6. Many of the testing skills are scenario-based, requiring teamwork. This allows several JPRs to be performed under the umbrella of a single State Testing Skill. Skills examiners must grade each student individually even when a student is acting as a member of a working team. This will provide a realistic testing environment that requires examinees to demonstrate the knowledge, skills and abilities entry level fire fighters must have to perform their jobs. These testing skills are not designed to be used as teaching aids. Testing skills are broad in scope and don’t adequately get into the details of how to perform each step of a given skill – they are designed for testing. Feel free to use the Instructional Skills for teaching purposes, however, they are not required. Each academy may create its own skill sheets for instructional purposes.

Some skills have multiple testing possibilities built into them (i.e., a “random selection” component). The commission will randomly select the options if those skills are drawn. For example, in Live Fire #7, you would only be required to perform one of four possible scenarios: (1) below grade level, (2) above grade level, (3) grade level fires, or (4) attic fires. When you get the sealed envelope from the commission advising you which skills you must test, it will indicate the one option that was randomly selected for your academy to test.

All state testing skills are pass/fail at all steps. If a student fails one step they fail the skill.

INSTRUCTIONAL SKILLS

The Instructional Skills are available for academies to use to teach all the skills every fire fighter should know and be able to do when they are out in the field. If the student has mastered these instructional skills they should be confident in their ability to perform the state testing skills without failure.

Subject: Fireground Operations  
Section 101

NFPA 1001 5.3.16  
Firefighter I

OBJECTIVE
Extinguish incipient Class A, Class B, and Class C fires, given a selection of portable fire extinguishers, so that the correct extinguisher is chosen, the fire is completely extinguished, and correct extinguisher-handling techniques are followed. (5.3.16)

INSTRUCTIONS - procedures for achieving the objective
You shall demonstrate the operation of fire extinguishers on a Class A, B or C fire. You are required to properly select an appropriate extinguisher, properly approach, extinguish, and withdraw after the fire is completely extinguished. Only one extinguisher may be used on each class of fire. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
Maximum safe distances for:

- Water extinguisher - 30 feet
- AFFF extinguisher - 25 feet
- Dry chemical - 20 feet

The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Stored-pressure water extinguisher - 2½ gallons
AFFF extinguisher - 2½ gallons
Dry chemical extinguisher - 20 pound
16 square foot metal pan (minimum size)
Class A fuel
Class B fuel
Class C fuel (may be simulated)

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots, and SCBA.

COMMUNICATIONS #1
Ordering and Transmitting an Alarm Response

Subject: Fire Department Communications

NFPA 1001 5.2.1, 5.2.2, 5.2.3

Firefighter I

OBJECTIVE
Initiate the response to a reported emergency, given the report of an emergency, fire department SOPs, and communications equipment, so that all necessary information is obtained, communications equipment is operated correctly, and the information is relayed promptly and accurately to the dispatch center. (5.2.1)

Receive a telephone call, given a fire department phone, so that procedures for answering the phone are used and the caller’s information is relayed. (5.2.2)

Transmit and receive messages via the fire department radio, given a fire department radio and operating procedures, so that the information is accurate, complete, clear, and relayed within the time established by the AHJ. (5.2.3)

INSTRUCTIONS - procedures for achieving the objective
Given a randomly selected scenario as a member of a team, you shall demonstrate the ability to perform one of the following skills:

- Routine communication
- Emergency communication

Given an emergency or routine communication scenario, the examinee shall demonstrate proficiency in the operation of the fire station communications equipment, record information, relay information, operate radio equipment, and discriminate between routine and emergency traffic.

You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

PREPARATION & EQUIPMENT
Communication equipment appropriate to the scenario

NFPA 1001 – 5.1.2

Firefighter I

OBJECTIVE
The firefighter trainee will locate information in departmental documents and standard or code materials. (5.1.2)

INSTRUCTIONS - procedures for achieving the objective
You will be given a scenario requiring you to locate federal, state and local documents (NFPA, CFR, TCFP, AHJ). You will physically locate or verbalize the location of the documents in an efficient manner. The skill will begin on my instruction to start. The skill will end when you inform me that you have completed the skill. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Access to federal, state and local standards, codes and documents.
The firefighter trainee will locate information in departmental documents and standard or code materials.

 Subject: Prevention, Preparedness, and Maintenance

NFPA 1001 5.5.2 Firefighter I

OBJECTIVE
Clean and inspect hose, given washing equipment, water, detergent, tools, and replacement gaskets, so that damage is noted and corrected, the hose is clean. (5.5.2)

INSTRUCTIONS - procedures for achieving the objective
Given a scenario, you will be assigned a section of hose to clean and inspect. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Assorted hose
Cleaning and inspection equipment per AHJ

The firefighter trainee shall accomplish this skill wearing, as a minimum, protective trousers and boots.

LADDERS #1
Set up Ground Ladders

Subject: Fireground Operations
Section 101

NFPA 1001 5.3.6 Firefighter I

OBJECTIVE
Set up ground ladders, given single and extension ladders, an assignment, and team members if needed, so that hazards are assessed, the ladder is stable, the angle is correct for climbing, extension ladders are extended to the necessary height with the fly locked, the top is placed against a reliable structural component, and the assignment is accomplished. (5.3.6)

INSTRUCTIONS - procedures for achieving the objective
You will be given an assignment to set up ground ladders, given single and extension ladders, and team members if needed. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
This skill may be used in conjunction with other appropriate skills. Given a randomly selected scenario as a member of a team, you shall demonstrate the ability to perform one of the following skills:

- Single ladder carry and raise
- Extension ladder carry and raise

PREPARATION & EQUIPMENT
Appropriate protective equipment
Single and extension ladders
Training tower

The firefighter trainee shall accomplish the skill wearing appropriate PPE.

Overall Skill Sheet Re-Test Score

Pass ☐ Fail ☐
OBJECTIVE
Attack an interior structure fire operating as a member of a team, given an attack line, ladders when needed, personal protective equipment, tools, and an assignment, so that team integrity is maintained, the attack line is deployed for advancement, ladders are correctly placed when used, access is gained into the fire area, effective water application practices are used, the fire is approached correctly, attack techniques facilitate suppression given the level of the fire, hidden fires are located and controlled, the correct body posture is maintained, hazards are recognized and managed, and the fire is brought under control. (5.3.10)

INSTRUCTIONS - procedures for achieving the objective
Operating as a member of a team, you will demonstrate the proper technique for suppressing an interior structure fire using the direct, indirect, and combination attack methods of extinguishment. You will use a 1½" or 1¾" charged attack hose line for this skill. I will indicate to you which hose to replace or extend. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

If this skill is selected as a designated skill, you will be assigned one of the following:
- Grade level fire (must replace a burst hose line)
- Above grade level fire (must advance a hose line up a ladder)
- Below grade level fire (must extend a hose line and advance down interior stairwell)

Only the portions of the steps appropriate to the assigned fire will be evaluated.

EXAMINERS NOTE
Whenever possible integrate the evaluation of this skill within a consolidated fire ground/emergency scenario. This will allow multiple skills to be evaluated effectively in conjunction with other fire ground/emergency scenario activities. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Enough 1½" or 1¾" charged attack lines for the scenario
Material for burning (must comply with NFPA 1403)
Multilevel burn facility
All needed support equipment and personnel for the scenario

LIVE FIRE TRAINING #2
Storage Container Fires

Subject: Fireground Operations Section 101

NFPA 1001 5.3.8 Firefighter I

OBJECTIVE
Extinguish fires in exterior Class A materials, given fires in stacked or piled and small unattached structures or storage containers that can be fought from the exterior, attack lines, hand tools and master stream devices, and an assignment, so that exposures are protected, the spread of fire is stopped, collapse hazards are avoided, water application is effective, the fire is extinguished, and signs of the origin area(s) and arson are preserved. (5.3.8)

INSTRUCTIONS - procedures for achieving the objective
Given the proper equipment and assistance, you shall demonstrate the proper technique for extinguishing a fire in an storage container. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Pumper apparatus
Attack hoses and nozzles
Storage container (exterior dumpster or trash bin)

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots, and SCBA.

Section 101

NFPA 1001 5.3.19

Firefighter I

OBJECTIVE
The firefighter trainee, operating as a member of a team, shall demonstrate or describe the proper technique for combating a ground cover fire, so that threats to property are reported, threats to personal safety are recognized, retreat is quickly accomplished when warranted, and the assignment is completed. (5.3.19)

INSTRUCTIONS - procedures for achieving the objective
Operating as a member of a team, you shall demonstrate and describe the proper techniques for combating a ground cover fire, so that threats to property are reported, threats to personal safety are recognized, retreat is quickly accomplished when warranted, and the assignment is completed. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing. This is a simulation. The examinee is to demonstrate and describe proper techniques. It is NOT necessary to actually construct the fire line and it is NOT necessary to attack an actual fire. You do not have to ask the wind direction questions at the first, it can be asked at any point during the examinee’s demonstration.

PREPARATION & EQUIPMENT
Task appropriate protective clothing (according to the SOP of the authority having jurisdiction)
Hose lines
Extinguishers and/or hand tools
Assignments for combating a ground fire

The firefighter trainee shall accomplish the skill wearing "TASK APPROPRIATE PROTECTIVE CLOTHING" as required by the Texas Commission on Fire Protection.
LIVE FIRE TRAINING #4
Combat Ground Cover Fires

The ability to determine exposure threats based on fire spread potential, protect exposures, construct a fire line or extinguish with hand tools, maintain integrity of established fire lines, and suppress ground cover fires using water.

MAINTENANCE #1
Cleaning, maintenance, and placing equipment in a ready state

Subject: Prevention, Preparedness, and Maintenance  Section 101
NFPA 1001 5.5.1, 5.1.2  Firefighter I

OBJECTIVE
Clean and check ladders, ventilation equipment, SCBA, ropes, salvage equipment, and hand tools, given cleaning tools, cleaning supplies, and an assignment, so that equipment is clean and maintained according to manufacturer’s or departmental guidelines, maintenance is recorded, and equipment is placed in a ready state or reported otherwise. (5.5.1)

The firefighter trainee will locate information in departmental documents and standard or code materials. (5.1.2)

INSTRUCTIONS - procedures for achieving the objective
Given a randomly selected piece of equipment, you shall demonstrate the ability to clean, check, and place equipment in a ready state or report otherwise.

- Ladders
- Ventilation equipment
- SCBA
- Replacement cylinders
- Ropes
- Salvage equipment
- Hand tools

OVERHAUL #1
Exposure of Hidden Fires

Subject: Fireground Operations  Section 101

NFPA 1001 5.3.13  Firefighter I

OBJECTIVE
Overhaul a fire scene, given personal protective equipment, attack line, hand tools, a flashlight, and an assignment, so that structural integrity is not compromised, all hidden fires are discovered, fire cause evidence is preserved, and the fire is extinguished. (5.3.13)

INSTRUCTIONS - procedures for achieving the objective
You will overhaul a fire scene, given personal protective equipment, attack line, hand tools, a flashlight, and an assignment, so that structural integrity is not compromised, all hidden fires are discovered, fire cause evidence is preserved, and the fire is extinguished. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Personal protective equipment
Attack line
Hand tools
A flashlight

The firefighter trainee shall accomplish the skill wearing appropriate protective equipment for the scenario.

OBJECTIVE
The firefighter trainee will prepare protective clothing for reuse. (5.1.2)

INSTRUCTIONS - procedures for achieving the objective
You will be given a complete set of personal protective equipment. You shall perform an inspection of the personal protective clothing in a proficient manner. You will recommend cleaning, repair or replacement based on Standard Operating Procedures. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

NFPA 1001 5.1.2                                        Firefighter I

OBJECTIVE
The firefighter trainee will demonstrate the ability to don personal protective clothing within 1 minute; doff personal protective clothing. (5.1.2)

INSTRUCTIONS - procedures for achieving the objective
You will be given a complete set of protective clothing (turnout coat, turnout pants, hood, gloves, helmet, and boots). You will be required to properly don the protective clothing in 1 minute. After you have donned the clothing, reverse the procedure to doff and place in ready state. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
Only the donning of the protective clothing will be timed. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

ROPES #1
Hoisting tools and equipment using ropes

Subject: General
Section 101

NFPA 1001 – 5.1.2
Firefighter I

OBJECTIVE
The firefighter trainee will hoist tools and equipment using ropes and the correct knot. (5.1.2)

INSTRUCTIONS - procedures for achieving the objective
A tool has been randomly selected for you to hoist. You will select the type and length of rope which will be adequate to meet this skill. You will ensure that the deployed section of rope is safe to use. Using the appropriate knot for the given tool, you will hoist the tool to a level determined by the scenario in a safe and proficient manner. The skill will begin on my instruction to start. The skill will end when you inform me that you have completed the skill. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Adequate length of rope
Appropriate tool (randomly selected from the list below)
- Axe
- Pike pole
- Ladder
- Charged and uncharged hose line
- Exhaust fan
- Chain saw

The firefighter trainee shall accomplish the skill wearing appropriate PPE.

SAFETY #1
Techniques for Actions When Trapped or Disoriented

Subject: Fireground Operations
Section 101

NFPA 1001 5.3.5
Firefighter I

OBJECTIVE
Exit a hazardous area as a team, given vision-obscured conditions, so that a safe haven is found before exhausting the air supply, others are not endangered, and the team integrity is maintained. (5.3.5)

INSTRUCTIONS - procedures for achieving the objective
While wearing protective clothing, the Self Contained Breathing Apparatus mask will be vision-obscured or a simulated smoke charged atmosphere will be used. You will demonstrate techniques for the actions required when trapped or disoriented in a fire situation or hostile environment and verbally identify an example of a safe haven in your scenario. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
If the charged hose line is chosen, you will place a charged hose line inside the structure with twists, turns, and loops or use multiple sections of hose. Place the trainee in the center of structure and attempt to disorient him/her. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Appropriate length and size of hose with nozzle or guideline
Appropriate communication equipment

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots, SCBA, and PASS device.

SAFETY #2
Terminating Utility Service

Subject: Fireground Operations

NFPA 1001 5.3.18

Firefighter I

OBJECTIVE
Turn off building utilities, given tools and an assignment, so that the assignment is safely completed. (5.3.18)

INSTRUCTIONS - procedures for achieving the objective
You will be given a choice of required tools. Utilizing these tools, demonstrate locating the proper shutoff locations and shut off the valves or control devices for gas, water, and electric service to a building. You will wear full protective clothing for this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Building utility props
Water meter key
Gas meter key
Spanner wrench
Adjustable wrench

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots, and SCBA.

NFPA 1001 5.3.17 firefighter I

Objective
Illuminate the emergency scene, given fire service electrical equipment and an assignment, so that designated areas are illuminated and all equipment is operated within the manufacturer’s listed safety precautions. (5.3.17)

Instructions - procedures for achieving the objective
Given a portable power or mounted power plant with lights, cords, and connectors, you shall set up and operate lighting equipment to illuminate a simulated fireground. You will identify and verbally describe the safety procedures to be observed when using fire service lighting equipment. You will identify at least three potential safety hazards when working with electricity on the fireground. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

Examiners Note
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

Preparation & Equipment

SAFETY #4
Use of Safety Equipment While Riding on Fire Apparatus

Subject: Fireground Operations

NFPA 1001 5.3.2

Firefighter I

OBJECTIVE
Respond on apparatus to an emergency scene, given personal protective clothing and other necessary personal protective equipment, so that the apparatus is correctly mounted and dismounted, seat belts are used while the vehicle is in motion, and other personal protective equipment is correctly used. (5.3.2)

INSTRUCTIONS - procedures for achieving the objective
You shall don personal protective clothing, mount the apparatus, and don safety devices. You shall perform this objective in a riding location while observing all safety procedures or rules according to AHJ. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Firefighter protective clothing
Fire apparatus
Hearing protection
Seat mounted SCBA (if applicable, according to AHJ)

The firefighter trainee shall accomplish the skill wearing coat, trousers, and boots.

SAFETY #5
Procedures When Working in Protected Work Areas

Subject: Fireground Operations

NFPA 1001 5.3.3

Firefighter I

OBJECTIVE
Establish and operate in work areas at emergency scenes, given protective equipment, traffic and scene control devices, structure fire and roadway emergency scenes, traffic hazards and downed electrical wires, and assignment, and SOPs, so that procedures are followed, protective equipment is worn, protected work areas are established as directed using traffic and scene control devices, and the fire fighter performs assigned tasks only in established, protected work areas. (5.3.3)

INSTRUCTIONS - procedures for achieving the objective
Given a fire apparatus, dismount and remove equipment from the compartments of fire apparatus at a simulated emergency scene. You will establish a protected work area per AHJ. You will verbally describe and follow all safety procedures. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Fire apparatus
Appropriate protective clothing
Traffic and scene control devices
Miscellaneous tools and equipment

The firefighter trainee shall accomplish the skill wearing appropriate PPE per AHJ.

Section 101

NFPA 1001 5.3.14 Firefighter I

OBJECTIVE
Conserve property as a member of a team, given salvage tools and equipment and an assignment, so that the building and its contents are protected from further damage. (5.3.14)

INSTRUCTIONS: Procedures for achieving the objectives
Given a randomly selected skill as a member of a team, you shall demonstrate the ability to perform one of the following skills:

- Construct water chute
- Cluster furniture and deploy covering materials
- Roll and/or fold salvage covers for reuse
- Construct catch-all and water chute(s) to remove water
- Cover building opening including doors, windows, floor openings or roof openings
- Separate, remove and relocate charred material to a safe location while protecting the area of origin for cause determination
- Stop the flow of water from a sprinkler with sprinkler wedges or stoppers
- Operate a main control valve on an automatic sprinkler system

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing. Whenever possible integrate the evaluation of this skill within a consolidated fire ground/emergency scenario. This will allow multiple skills to be evaluated effectively in conjunction with other fire ground/emergency scenario activities.

PREPARATION & EQUIPMENT
Scenarios involving property conservation
Salvage tools and equipment

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots, hood, and SCBA.

SCBA #1
Using SCBA during Emergency Operations

Subject: Fireground Operations
Section 101

NFPA 1001 5.3.1 Firefighter I

OBJECTIVE
Use self-contained breathing apparatus (SCBA) during emergency operations, given SCBA and other personal protective equipment, so that the SCBA is correctly donned and activated within 1 minute, the SCBA is correctly worn, controlled breathing techniques are used, emergency procedures are enacted if the SCBA fails, all low-air warnings are recognized, respiratory protection is not intentionally compromised, and hazardous areas are exited prior to air depletion. (5.3.1)

INSTRUCTIONS - procedures for achieving the objective
Given a randomly selected scenario as a member of a team, you shall demonstrate the ability to perform one of the following skills:

• perform complete donning procedures and/or show the ability to control breathing
• replace SCBA air cylinders
• use SCBA to exit through restricted passages
• initiate and complete emergency procedures in the event of SCBA failure or air depletion

EXAMINERS NOTE
Must provide a scenario that involves one or a combination of the following situations:

• demonstrate the ability to control breathing
• replace SCBA air cylinders
• use SCBA to exit through restricted passages
• initiate and complete emergency procedures in the event of SCBA failure or air depletion

The Fire Fighter I should already be wearing full protective clothing prior to the beginning of this SCBA-donning procedure. In addition to fully donning and activating the SCBA, the Fire Fighter I should also replace any personal protective clothing (i.e., gloves, protective hood, helmet, etc.) displaced during the donning procedure and activate the personal alert safety system (PASS) device within the specified 1-minute time limit. (NFPA 1001, A-5.3.1)

The firefighter trainee will not be allowed to review the performance steps at the time of testing.

Search and Rescue Skill #1
Conduct a search and rescue

Subject: Fireground Operations Section 101
NFPA 1001 5.3.9 Firefighter I

OBJECTIVE
Conduct a search and rescue in a structure operating as a member of a team, given an assignment, obscured vision conditions, personal protective equipment, a flashlight, forcible entry tools, hose lines, and ladders when necessary, so that ladders are correctly placed when used, all assigned areas are searched, all victims are located and removed, team integrity is maintained, and team members’ safety, including respiratory protection, is not compromised. (5.3.9)

INSTRUCTIONS - procedures for achieving the objective
Given a randomly selected scenario as a member of a team, you shall demonstrate the ability to perform one of the following skills:
• set up and use different types of ladders to rescue a person who has no respiratory protection
• rescue a fire fighter with functioning respiratory protection exiting through restricted passages
• rescue a fire fighter whose respiratory protection is not functioning

You and a designated team member shall enter a perceived IDLH atmosphere and conduct search and rescue for victim(s). You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
Each scenario must include one or a combination of the following:

• exiting through restricted passages
• setting up and use different types of ladders
• rescuing a fire fighter with functioning respiratory protection
• rescuing a fire fighter whose respiratory protection is not functioning
• rescuing a person who has no respiratory protection

The perceived IDLH atmosphere may be obscured vision conditions. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

Subject: Fireground Operations

NFPA 1001 5.3.11, 5.3.12

OBJECTIVE
Perform horizontal ventilation on a structure operating as part of a team, given an assignment, personal protective equipment, ventilation tools, equipment, and ladders, so that the ventilation openings are free of obstructions, tools are used as designed, ladders are correctly placed, ventilation devices are correctly placed, and the structure is cleared of smoke. (5.3.11)

Perform vertical ventilation on a structure as part of a team, given an assignment, personal protective equipment, ground and roof ladders, and tools, so that ladders are positioned for ventilation, a specified opening is created, all ventilation barriers are removed, structural integrity is not compromised, products of combustion are released from the structure, and the team retreats from the area when ventilation is accomplished. (5.3.12)

INSTRUCTIONS: Procedures for achieving the objectives
Given a randomly selected scenario as a member of a team, you shall demonstrate the ability to perform one of the following skills:

• horizontal ventilation
• vertical ventilation

You will perform (horizontal or vertical) ventilation on a structure as part of a team, given a scenario, personal protective equipment, ground and roof ladders, and tools, so that ladders are positioned for ventilation, a specified opening is created, all ventilation barriers are removed, structural integrity is not compromised, products of combustion are released from the structure, and the team retreats from the area when ventilation is accomplished. You will be required to both verbalize key steps and complete mandatory steps while performing this skill. You will perform this skill in a safe and proficient manner. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The examiner will choose either a horizontal or vertical ventilation scenario. The firefighter trainee will not be allowed to review the performance steps at the time of testing. Whenever possible integrate the evaluation of this skill within a consolidated fire
ground / emergency scenario. This will allow multiple skills to be evaluated effectively in conjunction with other fire ground / emergency scenario activities.

**PREPARATION & EQUIPMENT**
Ventilation scenario
Ventilation prop
PPV or smoke ejector
Appropriate length and size of hose with nozzle
Tools as needed for the scenario (chain saw, axe, pike pole, etc.)
Roof ladder
Extension ladder

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include, helmet, gloves, coat, trousers, boots, hood, and SCBA.

Subject: Fireground Operations Section 101

NFPA 1001 5.3.15 Firefighter I

OBJECTIVE
Connect a fire department pumper to a water supply as a member of a team, given supply or intake hose, hose tools, and a fire hydrant or static water source, so that connections are tight and water flow is unobstructed. (5.3.15)

INSTRUCTIONS - procedures for achieving the objective
Given a randomly selected scenario as a member of a team, you shall demonstrate the ability to perform one of the following skills:

- hand lay a supply hose
- deploy portable water tanks (static water source) as well as the equipment necessary to transfer water between and draft from them
- make hydrant-to-pumper hose connections for forward or reverse lays, connect supply hose to a hydrant, and fully open and close the hydrant.

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Pumper
Sufficient amount of supply hose
Water source
Necessary adapters and tools
Portable water tank

The firefighter trainee shall accomplish the skill wearing appropriate PPE.
**Water Source #1**

EDUCATION #1
Present Fire Safety Information

Subject: Prevention, Preparedness, and Maintenance
Section 102

NFPA 1001 6.5.2
Firefighter II

OBJECTIVE
Present fire safety information to station visitors or small groups, given prepared materials, so that all information is presented, the information is accurate, and questions are answered or referred. (6.5.2)

INSTRUCTIONS - procedures for achieving the objective
You shall present fire safety information to your examiner, given prepared materials, so that all information is presented, the information is accurate, and questions are answered or referred. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing. Be prepared to ask questions as part of the evaluation.

PREPARATION & EQUIPMENT
Copies of one of the following:

1. Stop, Drop, and Roll
2. Crawl low in smoke
3. Escape Planning
4. Alerting Others
5. Calling the Fire Department
6. Fire Station Tour
7. Residential Smoke Detector Placement and Maintenance
8. School Exit Plan

FIRE SERVICE HOSE #3
Perform an Annual Fire Hose Test

Subject: Prevention, Preparedness, and Maintenance
Section 102

NFPA 1001 6.5.5
Firefighter II

OBJECTIVE
Perform an annual service test on fire hose, given a pump, a marking device, pressure gauges, a timer, record sheets, and related equipment, so that procedures are followed, the condition of the hose is evaluated, any damaged hose is removed from service, and the results are recorded. (6.5.5)

INSTRUCTIONS - procedures for achieving the objective
You shall demonstrate the proper method of service testing fire hose. You will be required to verbalize key steps while performing this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINER NOTE
The firefighter trainee shall begin with the hose rolled and stacked. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
300' of 1½" or larger hose
Spanners (2)
Nozzle for size hose or gated valve
Pen to mark hose (may verbalize marking)
Rope, rope hose tool, or hose strap

The firefighter trainee shall wear boots and helmet.

INCIDENT MANAGEMENT SYSTEM #1
Determine the Need for Command

Subject: General
Section 102
NFPA 1001  6.1.2, 6.2.2
Firefighter II

OBJECTIVE
The firefighter trainee shall determine the need for command, organize and coordinate
the Incident Management System until command is transferred, and function within an
assigned role in the Incident Management System. (6.1.2)

Communicate the need for team assistance, given fire department communications
equipment, SOPs, and a team, so that the supervisor is consistently informed of team
needs, departmental SOPs are followed, and the assignment is accomplished safely.
(6.2.2)

INSTRUCTIONS - procedures for achieving the objective
Given a specific scenario, you will determine the need for command, organize and
coordinate the Incident Management System until command is transferred, and function
within an assigned role in the Incident Management System. You will begin on my
instruction to start. The skill will end when you state to me that you have completed all
of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
Whenever possible integrate the evaluation of this skill within a consolidated fire
ground/emergency scenario. This will allow multiple skills to be evaluated effectively in
conjunction with other fire ground/emergency scenario activities. Here are some
possible scenarios.

- **Scenario #1**: Building fire, two story masonry construction. 30 feet by 50 feet.
  50% fire involvement on the first floor with fire extension to the second story.
  Need to call for a second alarm.
- **Scenario #2**: Large grass fire. Need to request mutual aid from a surrounding
department.
- **Scenario #3**: On the scene of an injury accident. Need to request a set of "jaws"
or request a second set.
- **Scenario #4**: On the scene of a long incident. Need to call for a canteen service,
such as the Salvation Army or other group.
- **Scenario #5**: On the scene of a hazardous materials incident. Need to call for
  more personnel and specialized equipment.
PREPARATION & EQUIPMENT
SOPs for alarm assignments
Communications equipment and procedures per AHJ

INSPECTIONS #1
Fire Safety Survey in a Private Dwelling

Subject: Prevention, Preparedness, and Maintenance  
NFPA 1001 6.5.1  
Firefighter II

OBJECTIVE
Perform a fire safety survey in a private dwelling, given survey forms and procedures, so that fire and life safety hazards are identified, recommendations for their correction are made to the occupant, and unresolved issues are referred to the proper authority. (6.5.1)

INSTRUCTIONS - procedures for achieving the objective
Given a dwelling, survey forms and procedures for a safety survey, you shall demonstrate the proper procedure for a home safety survey. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

The space to be surveyed must have a minimum of 2 life safety hazards for the firefighter trainee to identify.

PREPARATION & EQUIPMENT
Dwelling suitable for inspection  
Simulated fire department SOP  
Survey forms

OBJECTIVE
Extinguish an ignitable liquid fire, operating as a member of a team, given an assignment, an attack line, personal protective equipment, a foam proportioning device, a nozzle, foam concentrates and a water supply, so that the correct type of foam concentrate is selected for the given fuel and conditions, a properly proportioned foam stream is applied to the surface of the fuel to create and maintain a foam blanket, fire is extinguished, reignition is prevented, team protection is maintained with a foam stream, and the hazard is faced until retreat to safe haven is reached. (6.3.1)

INSTRUCTIONS - procedures for achieving the objective
You shall coordinate team members in the proper technique for extinguishing an ignitable liquid fire. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
Whenever possible integrate the evaluation of this skill within a consolidated fire ground/emergency scenario. This will allow multiple skills to be evaluated effectively in conjunction with other fire ground/emergency scenario activities. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Pumper apparatus
Attack hose and nozzles for two lines
Fire fighting foam and foam equipment
Simulated ignitable liquid fire

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots, and SCBA.

Subject: Fireground Operations  
Section 102

NFPA 1001 6.3.3  
Firefighter II

OBJECTIVE
Control a flammable gas cylinder fire operating as a member of a team. Given an assignment, a cylinder outside of a structure, an attack line, personal protective equipment, and tools, so that crew integrity is maintained, contents are identified, safe havens are identified prior to advancing, open valves are closed, flames are not extinguished unless the leaking gas is eliminated, the cylinder is cooled, cylinder integrity is evaluated, hazardous conditions are recognized and acted upon, and the cylinder is faced during approach and retreat. (6.3.3)

INSTRUCTIONS - procedures for achieving the objective
You shall operate as member of a team in the proper technique for extinguishing a simulated fire involving a flammable gas cylinder. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
Whenever possible integrate the evaluation of this skill within a consolidated fire ground/emergency scenario. This will allow multiple skills to be evaluated effectively in conjunction with other fire ground/emergency scenario activities. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Pumper apparatus  
Attack hose and nozzles for two lines  
Simulated flammable gas cylinder

The firefighter trainee shall accomplish the skill wearing appropriate PPE.
LIVE FIRE TRAINING #6
Flammable Gas Cylinder Fire

Control a flammable gas cylinder fire operating as a member of a team. Given an assignment, a cylinder outside of a structure, an attack line, personal protective equipment, and tools, so that crew integrity is maintained, contents are identified, safe havens are identified prior to advancing, open valves are closed, flames are not extinguished unless the leaking gas is eliminated, the cylinder is cooled, cylinder integrity is evaluated, hazardous conditions are recognized and acted upon, and the cylinder is faced during approach and retreat. (6.3.3)

Simulated fire involving a flammable gas cylinder:

- Team executes effective advances and retreats
- Properly coordinates the 2 attack lines to ensure team safety
- Applies various techniques for water application when needed
- Verbally states that cylinder integrity and changing cylinder conditions are assessed as needed
- Chooses effective procedures when conditions change
- Operates control valves properly
- Verbally states that flame on relief valve should not be extinguished
- Controls leak and verbally states to let the flame burn out
- Performs skill in a safe and proficient manner

TEXAS COMMISSION ON FIRE PROTECTION
BASIC STRUCTURE FIRE SUPPRESSION
Performance Standards Evaluation

LIVE FIRE TRAINING #7
Coordinate an Interior Attack

Subject: Fireground Operations
Section 102

NFPA 1001, 6.3.2
Firefighter II

OBJECTIVE
Coordinate an interior attack line for team’s accomplishment of an assignment in a structure fire, given attack lines, personnel, personal protective equipment, and tools, so that crew integrity is established; attack techniques are selected for the given level of the fire (for example, attic, grade level, upper levels or basement); attack techniques are communicated to the attack team; constant team coordination is maintained; fire growth and development is continuously evaluated; search, rescue, and ventilation requirements are communicated or managed; hazards are reported to the attack team; and incident command is apprised of changing conditions. (6.3.2)

INSTRUCTIONS - procedures for achieving the objective
Given a fire scenario or simulation, you shall coordinate an interior attack, maintain team coordination. You shall communicate attack techniques, fire growth and development, search, rescue and ventilation requirements, and report hazards to incident command. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

If this skill is selected as a designated skill, you will be assigned one of the following:
- Grade level fire
- Above grade level fire
- Below grade level fire
- Attic fire

EXAMINERS NOTE
Whenever possible integrate the evaluation of this skill within a consolidated fire ground/emergency scenario. This will allow multiple skills to be evaluated effectively in conjunction with other fire ground/emergency scenario activities. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

(A.6.3.2) The firefighter II should be able to coordinate the actions of the interior attack line team at common residential fires and small business fires in the department’s district. Complex or large interior fire management should be left to officers; however, this JPR will facilitate the development of the firefighter II towards effectively handling specific assignments within large fires.
Texas Commission on Fire Protection
Basic Structure Fire Suppression
Performance Standards Evaluation

Preparation & Equipment
Pumper apparatus
Attack hose and nozzles for two lines
Two story structure suitable for simulating a fire attack

RESCUE #1
Demonstration of Extrication Tools

Subject: Rescue Operations
Section 102

NFPA 1001 6.4.1 Firefighter II

OBJECTIVE
Extricate a victim entrapped in a motor vehicle as part of a team, given stabilization and extrication tools, so that the vehicle is stabilized, the victim disentangled without further injury, and hazards are managed. (6.4.1)

INSTRUCTIONS - procedures for achieving the objective
You and designated team members, given a vehicle and appropriate rescue tools, will demonstrate any of the following evolutions which may be required to extricate an entrapped victim of a motor vehicle accident by displacing: 1) a vehicle roof, 2) a vehicle door, 3) a vehicle windshield, 4) a steering wheel or column, and 5) a dashboard. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing. NOTE: See NFPA 1001 A 6.4.1 below:

NFPA 1001 A.6.4.1 In the context of this standard, the term extricate refers to those activities required to allow emergency medical personnel access to the victim, stabilization of the vehicle, the displacement or removal of vehicle components obstructing victim removal, and the protection of the victim and response personnel from hazards associated with motor vehicle accidents and the use of hand and power tools on a motor vehicle.

PREPARATION & EQUIPMENT
Cribbing and shoring materials
Hydraulic devices
Pneumatic devices
Ratchet devices
Vehicle for extrication evolution

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, and boots. The trainee is not required to wear an SCBA or hood.

Rescue #2
Assist Rescue Operation Teams

Subject: Rescue Operations

NFPA 1001 6.4.2  Firefighter II

Objective
Assist rescue operation teams, given standard operating procedures, necessary rescue equipment, and an assignment, so that procedures are followed, rescue items are recognized and retrieved in the time as prescribed by the AHJ, and the assignment is completed. (6.4.2)

Requisite Knowledge: The firefighter’s role at a technical rescue operation, the hazards associated with technical rescue operations, types and uses for rescue tools, and rescue practices and goals.

Instructions - procedures for achieving the objective
You will assist a rescue operation team, following accepted standard operating procedures (SOP), necessary rescue equipment, and an assignment. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

Examiners Note
The firefighter trainee will not be allowed to review the performance steps at the time of testing. NOTE: See NFPA 1001 A 6.4.2 below:

NFPA 1001 A 6.4.2 The Fire Fighter II is not expected to be proficient in technical rescue skills. The Fire Fighter II should be able to help technical rescue teams in their efforts to safely manage structural collapses, trench collapses, cave and tunnel emergencies, water and ice emergencies, elevator and escalator emergencies, energized electrical line emergencies, and industrial accidents.

Preparation & Equipment
Department Rescue SOPs or recognized safety practices of the AHJ
Various rescue equipment used by AHJ
Scenarios based on equipment and SOPs used by AHJ

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, and boots. The trainee is not required to wear a SCBA or hood unless required by the scenario.

INSTRUCTIONAL SKILLS MANUAL

BASIC FIRE SUPPRESSION

EFFECTIVE JANUARY 1, 2013

Texas Commission on Fire Protection
P.O. Box 2286, Austin, Texas  78768-2286  (512) 936-3838
Subject: Fire Department Communications

NFPA 1001 5.2.2

OBJECTIVE
The firefighter trainee shall explain the procedures for receiving an alarm from the fire department dispatcher or a report of an emergency from the public and demonstrate appropriate action.

INSTRUCTIONS - procedures for achieving the objective
Given a call from a dispatcher, or an emergency from the public, you will explain the procedures for receiving an alarm from the dispatcher by verbalizing how the alarm is received. Then, when given a simulated alarm, you will verbally explain the appropriate actions for recording and acknowledging the alarm. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
dispatched call (may be simulated)

COMMUNICATION #4
Receiving a Business or Personal Telephone Call

Subject: Fire Department Communications  
Section 101

NFPA 1001 5.2.2  
Firefighter I

OBJECTIVE
Receive a telephone call, given a fire department phone, so that procedures for answering the phone are used and the caller’s information is relayed.

INSTRUCTIONS - procedures for achieving the objective
Given a fire department business phone and equipment for recording information, you will verbally explain the procedures for receiving a business telephone call on the fire department phone. Then, you will demonstrate the procedures by receiving a simulated telephone call. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Dispatched call (may be simulated)  
Non-testing personnel to place the simulated call
Equipment used for recording this information as determined by the authority having jurisdiction, (examples: paper and pencil, dry erase board, etc.)
COMMUNICATION #4
Receiving a Business or Personal Telephone Call

The firefighter trainee shall verbally explain the procedures for receiving a business telephone call on the fire department phone. Then, the firefighter trainee shall demonstrate the procedure by receiving a simulated telephone call.

a. Verbalizes a correct explanation of the procedures
b. Answers the call promptly and courteously
c. Demonstrates good verbal skills for telephone communications (pleasant, correct volume and tone)
d. Has no “open line” or extended time on hold for caller
e. Posts or delivers message promptly to intended recipient
f. Terminates the call courteously
g. Message is accurate and complete
h. Followed correct procedures

Identify, Carry, and Use the Correct Tool(s)

Subject: Fireground Operations

NFPA 1001 5.3.4  Firefighter I

OBJECTIVE
The firefighter trainee, given a selection of forcible entry tools, shall select, identify, and carry the correct tool(s) as it applies to the individual performance skills listed below. The trainee shall simulate the correct method of opening any of the following doors, windows, walls, and partitions. The trainee will be required to verbalize key points while simulating the individual performance skills. The trainee will be scored on three performance skills.

INSTRUCTIONS: Procedures for achieving the objectives
Given a selection of forcible entry tools, you shall select, identify, and safely carry the correct tool(s) as it applies to the individual performance skills listed below. You shall simulate the correct method of opening any of the following doors, windows, walls, and partitions. You will be required to verbalize the key points while simulating the individual steps. You will be scored on three performance skills. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE:
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT:
Pry bar
Halligan tool
Pick-head axe
Flat-head axe
Pike pole
Hydraulic extrication tool
K-tool

The firefighter trainee shall accomplish the skills wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots, and SCBA.

### INSTRUCTIONAL SKILL

**Forcible Entry #1**
The firefighter trainee, given a selection of forcible entry tools, shall select, identify, and carry the correct tool(s) as it applies to the individual performance skills listed below. The trainee shall simulate the correct method of opening any of the following doors, windows, walls, and partitions. The trainee will be required to verbalize key points while simulating the individual performance skills. The trainee will be scored on three performance skills.

#### Tool #1 (Doors that open toward the firefighter)

- a. Correctly verbalizes the type of door
- b. Selects the proper tool(s)
- c. Inserts the blade of the tool between the door and jamb near the lock
- d. Forces the blade in and against the rabbet or stop
- e. Pries the tool bar away from the door to move the door and jamb apart
- f. Pulls or pries the door open with another tool until the lock clears the keeper

#### Tool #2 (Doors that open away from the firefighter where stops are used)

- a. Correctly verbalizes the type of door
- b. Selects the proper forcible entry tool(s)
- c. Bumps the cutting edge of the tool against the stop to break the paint or varnish.
- d. Loosens the stop at the lock or removes the lock completely
- e. Forces the blade between the door and jamb
- f. Makes initial pry after blade is inserted at least half way
- g. With full bite, pries the door away from the jamb
### Tool #3 (Doors that open away from the firefighter and have a rabbet jamb)
- a. Correctly verbalizes the type of door
- b. Selects the proper forcible entry tool(s)
- c. Places the blade of the tool flat against the door and inserts the blade (or tool edge) between the rabbet and the door
- d. Makes short pries with the first tool to spread the jamb
- e. Works the blade of the second tool between the door and the jamb, hammering the blade well into the opening
- f. Pries the door away from the jamb until the bolt passes the keeper

### Tool #4 (Door opened through the lock)
- a. Identifies the type of lock
- b. Selects the correct tool (K-tool) to open the lock
- c. Forces the K-tool into the correct position
- d. Inserts the prying tool into the metal loop of the K-tool
- e. Pries the cylinder from the door (using the K-tool as a fulcrum)
- f. Inserts the key into the hold made by the removed cylinder
- g. Operates the locking bolt by manipulating/rotating to the open position

### Tool #5 (Sliding Door)
- a. Chooses the correct tool(s)
- b. Inserts the blade between the jamb and the door at the lock
- c. Pries the door away from the jamb
- d. Verbalizes if the patio door is locked or blocked with a bar, the firefighter trainee should try another entrance or break the glass

### Tool #6 (Overhead Door)
- a. Chooses the correct tool(s)
- b. Locates the lock
- c. If possible, breaks the panel and reaches in to unlock the door or pulls the manual door release on a garage door opener
- d. Pries up on the door at the bottom
- e. Once the door is raised, blocks the door open

### For All Tools
Uses all tools safely

Subject: Fireground Operations

NFPA 1001 5.3.14 Firefighter I

OBJECTIVE
The firefighter trainee shall locate the Main Control Valve on a sprinkler system and correctly identify the position of the valve. The trainee shall close the valve fully, then re-open the valve fully. The trainee shall verbalize special conditions for the valve when placing the system in service.

INSTRUCTIONS - procedures for achieving the objective
You shall locate the Main Control Valve on a sprinkler system. You will then correctly identify and verbalize the position of the valve to the evaluator. You shall fully close the valve, then fully re-open the valve. After operating the valve, you shall verbalize special conditions for the valve when placing the system in service. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the above identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
An indicating control valve for a sprinkler system

OBJECTIVE
The firefighter trainee shall demonstrate the proper procedure for stopping the flow of water from a sprinkler head using a sprinkler stop or wedge. The trainee shall identify the style of sprinkler head, temperature rating, and the conditions at which the control valve may be closed.

INSTRUCTIONS - procedures for achieving the objective
While wearing full protective clothing, you shall demonstrate the proper procedure for stopping the flow of water from a sprinkler head using a sprinkler stop or wedge. You shall identify and verbalize to the evaluator the style of sprinkler head, temperature rating, and the conditions at which the system control valve may be closed. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE:
The firefighter trainee will not be allowed to review the performance steps at the time of testing. A mock-up for the objective can be created by using a section of pipe with one sprinkler head connected and supplied by a garden hose.

PREPARATION & EQUIPMENT
Sprinkler system or mock-up
Open sprinkler head
Replacement sprinkler head
Wood wedges or commercially made stopper

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots and SCBA.

OBJECTIVE
The firefighter trainee shall demonstrate the proper method of converting and extending a charged 2½” or 3” line into one 1½” or 1¾” attack line and shall operate a nozzle. The trainee shall accomplish the skill in 5 minutes or less.

INSTRUCTIONS - procedures for achieving the objective
While wearing full protective clothing and a Self-Contained Breathing Apparatus (SCBA), you shall demonstrate the proper method of converting and extending a charged hose line into a smaller attack line. You shall demonstrate the open and closed nozzle positions and any stream adjustments that are characteristic of the nozzle. You will have 5 minutes to complete this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed the identified steps. Do you understand these instructions?

EXAMINER NOTE
All extra equipment to perform this evolution shall be placed 5 feet from the coupling of the section to be extended. The extra hose shall be rolled with the female coupling exposed. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
2½” nozzle
1½” adjustable nozzle
100 feet of 1½” or 1¾” hose
50 feet of 2½” or 3” hose
Spanner Wrenches
Gated Wye
Siamese or similar hose appliance
Hose Clamp
Hydrant or fire truck can be used for water supply

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, coat, trousers, boots, gloves and SCBA. Firefighter trainee will not don face piece or hood.

Instructional Skills-HOSE #2
Demonstrate Proper Connection of Different Size Couplings and Use of Hose Adapters

Subject: Fireground Operations

NFPA 1001 5.3.10 Firefighter I

OBJECTIVE
The firefighter trainee, using two sections of fire hose of different diameters, shall demonstrate connecting the female ends of the hose together using an approved coupling method. The trainee shall accomplish the skill in 1½ minutes or less.

INSTRUCTIONS - procedures for achieving the objective
While wearing full protective clothing and a Self-Contained Breathing Apparatus (SCBA), you shall demonstrate connecting the female ends of two sections of fire hose of different diameters using an approved coupling method. You will have a maximum time limit to complete this skill of 1½ minutes. You will begin on my instruction to start. The skill will end when you state to me that you have completed the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
50 feet of 1½” or 1¾” fire hose
50 feet of 2½” or 3” fire hose
Reducer 2½” to 1½”
Double male coupling
Double female coupling
Assorted hose adapters and appliances

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots, and SCBA. Gloves shall be optional. Firefighter trainee will not don face piece or hood.

Instructional Skills-HOSE #3
Procedure for Connecting Hose to a Standpipe

Subject: Fireground Operations

NFPA 1001 5.3.10  Firefighter I

OBJECTIVE
The firefighter trainee, while wearing full protective clothing and a Self-Contained Breathing Apparatus (SCBA), and given a standpipe connection and the proper equipment, shall demonstrate carrying the hose into the building using proper techniques. The trainee shall accomplish the skill in 5 minutes or less.

INSTRUCTIONS - procedures for achieving the objective
While wearing full protective clothing and a SCBA, you shall demonstrate the proper method of carrying hose into a building, connecting it to a standpipe, and advancing the hose to its entire length. You shall complete the mandatory steps while performing this skill. You have 5 minutes to complete this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
A designated point will be determined by the staff examiner based on the testing site configuration. The staff examiner will designate the fire floor. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Appropriate hose adapters
100 feet of 1 ½" hose or larger
Standpipe connection or equivalent
Spanner wrenches
Nozzle

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots, and SCBA. Firefighter trainee will not don face piece.

The firefighter trainee, given the necessary equipment and assistance, shall demonstrate hoisting an uncharged 2½" or 3" hose line to an upper landing. The trainee shall then advance an uncharged 1½" or 1¾" hose line into a structure and up or down an interior stairway.

**Hoisting an uncharged hose line (2 ½ - 3 inch):**

- **a.** Arranges necessary equipment in an organized manner
- **b.** Safely hoists uncharged hose line to the roof or upper landing
- **c.** Keeps rope and hitches next to building with nozzle away from the building
- **d.** Raises hose and nozzle effectively and efficiently

**Uncharges hose line inside structure (1 ½ - 1 ¾ inch):**

- **a.** Effectively advances hose line wth partner to door
- **b.** Arranges necessary equipment in an organized manner
- **c.** Safely advances uncharged line to a second floor landing
- **d.** Feels the door with back of hand
- **e.** Bleeds air out of line before entering door
- **f.** Sets nozzle pattern before entering door
- **g.** Stays low while entering doorway
- **h.** Advances hose up a stairway, preventing kinks or complications, then advances hose back down stairway

OBJECTIVE
The firefighter trainee, given a 24 foot extension ladder in place, with full protective clothing and working with another team member, shall advance a charged attack line 1 ½ inch or larger up the ladder and operate the nozzle from the ladder.

INSTRUCTIONS - procedures for achieving the objective
Given a 24 foot extension ladder in place and working with another team member, you shall advance a charged 1 ½ inch attack line or larger up the ladder to a minimum height of 14 feet (or 2nd floor landing). You shall operate the nozzle from the ladder only after it is secured in place and you are secured on the ladder with a leg lock. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

SAFETY NOTE
Additional firefighters shall be utilized to heel the ladder and advance the hose as necessary.

PREPARATION & EQUIPMENT
24 foot extension ladder
1 ½” or 2 ½” hose
1 ½” or 2 ½” nozzle
Rope or hose strap

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots, and SCBA. Trainee shall not don face piece.

The firefighter trainee shall demonstrate the proper method of performing two types of hose carries: the accordion shoulder carry and the single section shoulder loop carry.

Accordion Shoulder Carry:

a. Grasps either of the two couplings and places it over the shoulder with the coupling behind the body at approximately waist height

b. Holds the hose in front of the body and, while walking slowly forward, forms a loop that hangs approximately at knee height in front of the body

c. While walking, guides the hose back over the same shoulder to form a loop that hangs at approximately knee height behind the body

d. Walks slowly down the hose, forming alternate loops in front of and behind the body until the entire hose is picked up

e. Carries the hose at least 20 feet in a controlled manner

Single Section Shoulder Loop Carry:

a. Places one end of the hose over the shoulder so that the coupling hangs at approximately waist height

b. Steps forward to form an approximate 3-foot loop on the ground behind, then picks up the hose at the closest point

c. Raises the loop and lays it over the shoulder without twisting or turning it over (expect loop to have a half-twist) and adjusts the loop so that the bottom is approximately mid-calf
d. Picks up entire length of hose and carries it at least 20 feet in a controlled manner

Subject: Fireground Operations

NFPA 1001 5.3.7, 5.3.10, 5.3.13  Firefighter I

OBJECTIVE
The firefighter trainee, given the necessary equipment and assistance, shall demonstrate advancing both charged and uncharged attack lines of two different sizes, 1½" or larger, from a pumper both up and down an outside stairway.

INSTRUCTIONS - procedures for achieving the objective
You shall demonstrate the proper method of advancing both charged and uncharged attack lines of two different sizes up an outside stairway to a second floor, then down an outside stairway to the lower floor. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Pumper
3 sections of 1 ½” and 1 ¾” hose
Rope
Appropriate nozzle(s) for each hose line

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots and SCBA.
In the image, there is information about the Texas Commission on Fire Protection's Instructional Skills for Hose #14. The document outlines the requirements for advancing charged and uncharged attack lines. The firefighter trainee is expected to demonstrate advancing both charged and uncharged attack lines of two different sizes, 1½” or larger, from a pumper both up and down an outside stairway.

The table below details the specific tasks and passes or fails for each size of hose:

Objectives
Connect a fire department pumper to a water supply as a member of a team, given supply or intake hose, hose tools, and a fire hydrant or static water source, so that connections are tight and water flow is unobstructed. (NFPA 1001, 5.3.15)

Instructions - procedures for achieving the objective
Given the proper equipment as a member of a team, you shall demonstrate the proper method of hand laying a given size and length of supply line from a pumper to a water source. You will be evaluated on your individual performance. You will begin on my instruction to start. The skill will end when the final performing team member states to me that all of the identified steps have been completed. Do you understand these instructions?

Examiners Note
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

Preparation & Equipment
Pumper
Sufficient amount of supply hose
Water source
Necessary adapters and tools

The firefighter trainee shall accomplish the skill wearing appropriate PPE.

OBJECTIVE
The firefighter trainee shall demonstrate the procedures for cleaning, maintaining, and inspecting for damaged fire hose, couplings, and nozzles.

INSTRUCTIONS - procedures for achieving the objective
You shall demonstrate the procedures for cleaning, maintaining, and inspecting for damage on: 1) fire hose, 2) nozzles, 3) hose couplings. You will be required to verbalize key steps while performing this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
1½ inch or larger fire hose
1½ inch or larger nozzle

The firefighter trainee shall accomplish the skill wearing helmet and boots.
The firefighter trainee shall demonstrate the procedures for cleaning, maintaining, and inspecting for damaged fire hose, couplings, and nozzles.

**Nozzle**
n. Checks nozzle bail or handle for function by moving it to the “OPEN” and “CLOSED” positions

b. Checks the gallonage setting for function by moving it to all of the various gallonage settings
c. Checks the fog rotating ring for function by rotating it
d. Checks the nozzle pattern adjustment for function by moving it to all the different settings
e. Checks nozzle gasket for defects, age, and ability to return to normal shape by pinching the gasket between the thumb and index fingers

**Fire hose**
a. Checks the expansion ring at both ends of the hose for burrs, looseness, or damage

b. Checks inner liner of hose, at both hose couplings, for signs of cracks, age, or defects and marks defective hose per department SOP
c. Checks outer hose jacket for signs of damage (thermal, mold, mildew, or chemical)
d. **Verbalizes how to operate hose washing and drying equipment and that hose should be testing annually**

**Couplings**
a. Checks male coupling for damage (chips, burrs, out-of-roundness)
b. Checks male coupling for tightness and proper mounting on hose
c. Checks female coupling for function and freedom of movement

Subject: Fireground Operations

NFPA 1001 5.3.11, 5.3.12 Firefighter I

OBJECTIVE
The firefighter trainee, without a life safety belt, shall demonstrate the techniques of working from a ground ladder with a fire fighting axe. The trainee shall accomplish the skill in 2 minutes or less.

INSTRUCTIONS - procedures for achieving the objective
Given a designated ladder, you shall demonstrate the techniques of working off a ground ladder with a fire fighting axe. You are required to climb to a height of approximately 8 feet. Prior to climbing, you shall check for proper angle of inclination. After reaching the appropriate height, you shall apply a leg lock and demonstrate working by making four (4) simulated chops with the axe. You have 2 minutes to complete this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINER NOTE
Time will begin when the firefighter trainee begins to check angle of inclination. Time will stop when the firefighter trainee makes four simulated chops with the axe. Unlocking and descending the ladder is not a part of the skill and is not to be timed. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
1 14 ft. ladder (or greater)
1 fire fighting axe

SAFETY NOTE: No heel person will be used. The ladder shall be tied off top and bottom.

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots, and SCBA. Firefighter trainee will not don face piece.
The firefighter trainee, without a life safety belt, shall demonstrate the techniques of working from a ground ladder with a fire fighting axe. The trainee shall accomplish the skill in 2 minutes or less.

OBJECTIVE
The firefighter trainee shall demonstrate the proper procedures to carry, position, and raise a 14 foot single or wall ladder using a low shoulder carry, right angle raise. Starting 100 feet from a designated structure, the trainee shall pick up, carry, and raise a 14 foot ladder to a single story roof or its equivalent. The trainee shall verbalize to the evaluator each step identified in bold print as it is performed. The skill shall be performed in 1½ minutes or less.

INSTRUCTIONS - procedures for achieving the objective
Using a low shoulder carry, you will pick up and carry a 14 foot ladder 100 feet to a designated structure. Using a right angle raise, you will raise the ladder to a single story roof or its equivalent. You shall verbalize the mandatory steps while performing this skill. You will begin on my instruction to start. You have 1½ minutes to complete this skill. The skill will end when you indicate that the ladder is suitable for climbing. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
14 foot single ladder

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots, and SCBA. Firefighter trainee will not don face piece.

Subject: Fireground Operations

NFPA 1001 5.3.6  Firefighter I

OBJECTIVE
The firefighter trainee, operating as a member of a team, shall demonstrate the proper procedures for a two firefighter pick up, Low Shoulder Carry, Right Angle Flat Raise of a 24 foot Extension Ladder. The skill shall be performed in 3 minutes or less.

INSTRUCTIONS - procedures for achieving the objective
Using a two firefighter low shoulder carry, you and a designated person will pick up and carry a 24 foot extension ladder 100 feet to a designated structure. You will raise the ladder to a two story window or its equivalent. You will be positioned at the butt end of ladder for this evaluation. You shall verbalize the mandatory steps while performing this skill. When you have reached your destination, you and your team member will raise the ladder using the Right Angle Flat Raise. You will only communicate with the other team member to assure the ladder is properly carried, raised, and extended. You have a maximum time limit to complete this skill of 3 minutes. You will begin on my instructions to start. Time will end when you verbally state that the ladder is suitable for climbing. Do you understand these instructions?

EXAMINERS NOTE:
Instruct the firefighter trainee where the ladder is to be placed and indicate the intended use: climbing, rescue, or ventilation. Ladder placement and intended use shall be the same for all examinees. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
24 ft. extension ladder
Drill tower or equivalent

NFPA 1001 5.3.6

Firefighter I

OBJECTIVE
The firefighter trainee, operating as a member of a team, shall demonstrate the proper procedures for a two firefighter pick up, Low Shoulder Carry, Right Angle Beam Raise of a 24 foot Extension Ladder. You will have 3 minutes to complete this skill.

INSTRUCTIONS - procedures for achieving the objective
Using a two firefighter low shoulder carry, you and a designated person will pick up and carry a 24 foot extension ladder 100 feet to a designated structure. You will raise the ladder to a two story window or its equivalent. You will be positioned at the butt of the ladder for the evaluation. You shall verbalize the mandatory steps while performing this skill. When you have reached your destination, you and your team member will raise the ladder using a right angle beam raise. You will only communicate with the other team member to assure the ladder is properly carried, raised, and extended. You have 3 minutes to complete this skill. The time will begin on my instruction to start. Time will stop when you verbally state that the ladder is suitable for climbing. Do you understand these instructions?

EXAMINERS NOTE:
Instruct the firefighter trainee where the ladder is to be placed and indicate the intended use: climbing, rescue, or ventilation. Ladder placement and intended use shall be the same for all examinees. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

24 ft. extension ladder
Drill tower or equivalent

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots, and SCBA. Firefighter trainee will not don face piece or hood.

NFPA 1001 5.3.6 Firefighter I

OBJECTIVE
The firefighter trainee, operating as a team member, shall demonstrate the proper two firefighter pick-up for a Low Shoulder Carry, Flat Parallel Raise of a 24 foot Extension ladder. The firefighter trainee shall perform all the identified steps in less than 3 minutes.

INSTRUCTIONS - procedures for achieving the objective
Using a two firefighter low shoulder carry, you and a designated person will pick up and carry a 24 foot extension ladder 100 feet to a designated structure. You will raise the ladder to a two story window or its equivalent. You will be positioned at the butt end of ladder for this evaluation. You shall verbalize the mandatory steps while performing this skill. When you have reached your destination, you and your team member will raise the ladder using the Right Angle Flat Raise. You will only communicate with the other team member to assure the ladder is properly carried, raised, and extended. You have a maximum time limit to complete this skill of 3 minutes. You will begin on my instructions to start. Time will end when you verbally state that the ladder is suitable for climbing. Do you understand these instructions?

EXAMINERS NOTE:
Instruct the firefighter trainee where the ladder is to be placed and indicate the intended use: climbing, rescue, or ventilation. Ladder placement and intended use shall be the same for all examinees. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
24 ft. extension ladder,
Drill tower, ladder wall, or equivalent

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots, and SCBA. Firefighter trainee will not don face piece or hood.

**The firefighter trainee:**

a. Carries the roof ladder, tip first, to the ladder placed at the structure

b. Sets the roof ladder on the ground near the ladder to be ascended and opens the hooks
c. Tilts the roof ladder up so that it rests against the other ladder, with the hooks facing outward
d. Climbs the main ladder until his/her shoulder is about two rungs above midpoint of the roof ladder
e. Reaches through the rungs of the roof ladder and hoists it onto his/her shoulder
f. Climbs to the top of the ladder, and uses a leg lock or life safety harness to lock into the ladder
g. Takes the roof ladder off the shoulder
h. Uses a hand over hand method to push the ladder onto the roof with the hooks in the down position
i. Pushes the roof ladder up the roof until the hooks go over the edge of the peak
j. Pulls the ladder back down so the hooks catch solidly over the peak

Subject: Fireground Operations

NFPA 1001 5.3.6, 5.3.12 Firefighter I

OBJECTIVE
Starting 100 feet from a designated two or more story structure, the firefighter trainee and the designated team members shall pick up, carry, and raise a 35 foot extension ladder to a third story window or its equivalent using a three firefighter flat shoulder carry, right angle flat raise. The trainee shall verbalize to the evaluator each step identified in bold print as it is performed. The trainee may only receive communication from the designated persons (team members) to ensure the ladder is properly carried, raised, and extended. The skill shall be performed in 3 minutes or less.

INSTRUCTIONS - procedures for achieving the objective
Using a three firefighter flat shoulder carry, you and designated persons will pick up a 35 foot extension ladder and carry it 100 feet to a designated structure. Using a right angle flat raise, you will raise the ladder to a three story window or its equivalent. You will be required to verbalize key steps and complete the mandatory steps while performing this skill. You and your team members will raise the ladder without laying the ladder on the ground. You will be required to set the ladder with at least three rungs inside the third story window or its equivalent. You will be positioned at the butt end of the ladder for this evaluation. You will only communicate with the other team members to assure the ladder is properly carried, raised, and extended. You will have a maximum time limit to complete this skill of 3 minutes. Time will start on my instructions to start. Time will end when you state that the ladder is suitable for climbing. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
35 ft. extension ladder
Two or more story structure or equivalent

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots and SCBA. Firefighter trainee will not don face piece.

The firefighter trainee and a designated team member shall enter a hostile environment and conduct a primary and secondary search for victim(s).

INSTRUCTIONS - procedures for achieving the objective
You and a designated team member shall enter a hostile environment and conduct a primary and secondary search for victim(s), both with and without a rope or hoseline. You will be required to both verbalize key steps and complete mandatory steps while performing this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The hostile atmosphere may be simulated with smoke or the mask may be blackened out. The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
1 - 50 ft. section of 1½" or 1¾" fire hose
1 - 50 ft. rope
Various forcible entry hand tools
Various objects to resemble furniture (or actual furniture)

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots and SCBA.

Instrucrional Skills -RESCUE #4
Removing Victims from Hazardous Environments

Subject: Fireground Operations

NFPA 1001 5.3.9  Firefighter I

OBJECTIVE
The firefighter trainee, while wearing full protective clothing and given proper equipment, shall demonstrate the proper technique for removal of an injured person from a hazardous environment. The firefighter trainee will demonstrate the techniques of packaging a victim for emergency transportation. The trainee shall accomplish the skill in 9 minutes or less.

INSTRUCTIONS - procedures for achieving the objective
Given the proper equipment, and wearing full protective clothing, you shall demonstrate each of the carries, drags, and the use of a stretcher. Using approved procedures for removing an injured person from a hazardous atmosphere, you will accomplish this skill in 9 minutes. You shall complete the mandatory steps while performing this skill. You will begin on my instruction to start. Each skill will end when you have moved the victim 20 feet from the initial site, and you state to me that you have completed all of the identified steps. Time will end when you have completed all three skills. For skills that require more than one person, extra personnel will be provided. The extra team members cannot discuss or provide any information to the trainee. You will give all directions when the skills require more than one person. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Blanket
Bunker coat
Stretcher or backboard
Individual or rescue mannequin
SCBA, ladders, forcible entry tools, hose lines, flashlight

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, coat, boots, hood, gloves, and trousers. Firefighter trainee will not don face piece or hood.

Instructional Skills - ROPES #1
Securing a Ladder to an Immovable Object

Subject: General
Section 101

NFPA 1001 5.1.1
Firefighter I

OBJECTIVE
The firefighter trainee shall secure a ladder using a proper technique. The firefighter trainee shall properly secure equipment to an immovable object with the appropriate securing device chosen. The trainee shall accomplish the skill in 4 minutes or less.

INSTRUCTIONS - procedures for achieving the objective
While wearing full protective clothing and a Self-Contained Breathing Apparatus (SCBA), you shall select an appropriate securing device and properly secure the ladder, at either the base or tip, to an immovable object. You will be required to complete the mandatory steps while performing this skill. You will begin on my instruction to start. You will have 4 minutes to complete this skill. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Rope
Rope hose tool/belt
Straight ladder (12 or 14 ft.)

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots, and SCBA. Firefighter trainee will not don face piece or hood.

### Allotted time for this skill: 4 minutes  
Time _____ minutes _____ seconds
Instructional Skills - ROPES #2
Rope Inspection & Maintenance Procedures

Subject: Prevention, Preparedness, and Maintenance
Section 101

NFPA 1001 5.5.1
Firefighter I

OBJECTIVE
The firefighter trainee given an adequate length of fire service rope, shall demonstrate the proper technique of inspecting the rope and verbalizing at least five (5) indicators of damage that are characteristic for the type of rope selected. The trainee shall describe the proper procedures for cleaning and storing selected rope. The trainee shall accomplish the skill in 4 minutes or less.

INSTRUCTIONS - procedures for achieving the objective
You shall demonstrate the proper technique of inspecting fire service rope and verbalizing at least five (5) indicators of damage that are characteristic for the type of rope selected. You shall describe the proper cleaning and storage procedures of the selected rope. You will be required to complete the mandatory steps while performing this skill. You will have 4 minutes to complete this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
10-25 feet of rope (synthetic/natural)

The firefighter shall accomplish the skill wearing a helmet.
The firefighter trainee given an adequate length of fire service rope, shall demonstrate the proper technique of inspecting the rope and verbalizing at least five (5) indicators of damage that are characteristic for the type of rope selected.

a. Inspects rope for damage and verbalizes at least 5 elements of rope degradation (Elements could include: softness, crusty spots, stiffness, brittleness, nicks, cuts, dirt, mildew, heat sears or discoloration, fuzziness, mushy spots, sheath sliding, lumps and/or depressions)

b. Examines the inner component by twisting the rope or feeling for bunching and thinness

c. Verbally explains that he/she would tage and remove from service any severely damaged rope

d. Verbally explains cleaning procedures

e. Verbally states that rope needs time to air dry completely

f. Verbally states an additional inspection is necessary after drying

g. Verbally states proper storage of rope

h. Completes skill in allotted time

Allotted time for this skill: 4 minutes

OBJECTIVE
The firefighter trainee shall demonstrate tying a becket bend (or sheet bend). The trainee shall select the type and length of rope which will be adequate to meet the provisions of this skill. The trainee shall verbally identify five (5) potential elements of rope degradation. The trainee shall verbally identify the working, standing, and running sections of the rope. Because of various acceptable sequential steps in completing a finished knot, the examiner will primarily evaluate the finished product for accuracy by comparing the knot to reference materials. The trainee shall accomplish the skill in 4 minutes or less.

INSTRUCTIONS - procedures for achieving the objective
You will select the type and length of rope which will be adequate to meet this skill. You will verbalize five (5) potential elements of rope degradation. You shall demonstrate tying a becket bend (or sheet bend). I will primarily evaluate the finished product for accuracy by comparing the knot to reference materials. You will also verbally identify the working, standing, and running sections of the rope. You will have 4 minutes to complete this skill. The skill will begin on my instruction to start. The time will stop when you inform me that you have completed the skill. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Two adequate lengths of rope of different diameters.

The firefighter trainee shall accomplish the skill wearing a helmet.

REVISED JULY 30, 2013
Objective
The firefighter trainee, given a salvage cover that is fully opened on a flat surface, shall demonstrate the proper method for rolling a salvage cover using the "one-firefighter roll" method. Upon completion, the trainee will demonstrate a "one-firefighter spread" utilizing the rolled salvage cover. The trainee shall accomplish the skill in 8 minutes or less.

Instructions - procedures for achieving the objective
Given a salvage cover that is fully opened on a flat surface, you and a designated partner shall demonstrate the proper method for rolling a salvage cover using the "one-firefighter roll" method. Upon completion, you will demonstrate a "one-firefighter spread" utilizing the rolled salvage cover. During this evaluation, you will give all verbal commands for completion of the steps. You have 8 minutes to complete this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed the identified steps. Do you understand these instructions?

Examiners note
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

Preparation & equipment
Salvage cover
Furniture or similar items

The firefighter trainee shall accomplish the skill wearing "Full Protective Clothing for Structural Firefighters" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots, and SCBA. Firefighter trainee will not don face piece or hood.

The firefighter trainee, given a salvage cover that is fully opened on a flat surface, shall demonstrate the proper method for rolling a salvage cover using the "one-firefighter roll" method. Upon completion, the trainee will demonstrate a "one firefighter spread" utilizing the rolled salvage cover. The trainee shall accomplish the skill in 8 minutes or less.

Roll for one-firefighter spread:

a. Grasps the cover with the outside hand midway between the center and the edge to be folded, places the other hand as a pivot point midway between the outside hand and the center, and brings the fold over to the center

b. Brings the outside edge over to the center and places it on top of and in line with the previously placed first fold

c. Folds other half of the cover in the same manner as steps a and b

d. Folds over about 12 inches at each end

e. Rolls and compresses one end to complete a tight compact roll

One fire-fighter spread:

a. Clusters furniture together, then starts at one end of the cluster and unrolls a sufficient amount to cover the end

b. Lays the roll on the object and continues to unroll toward the opposite end

c. Covers the opposite end adequately

d. Stands at one end, grasps the open edges, and opens the sides by snapping hands up and out

e. Opens the other end of the cover over the object in the same manner and straightens the cover and tucks in the

OBJECTIVE
The firefighter trainee and a designated partner shall demonstrate the proper method for folding a salvage cover using the "two-firefighter" method. Upon completion, the trainee will demonstrate a "two-firefighter spread" utilizing the previously folded salvage cover. The trainee shall accomplish the skill in 5 minutes or less.

INSTRUCTIONS - procedures for achieving the objective
Given a salvage cover that is fully opened on a flat surface, you and a designated partner shall demonstrate the proper method for folding a salvage cover using the "two firefighter fold" method. Upon completion, you and a designated partner shall demonstrate a "two firefighter spread" utilizing the previously folded salvage cover. During this evaluation, you will give all verbal commands for completion of the steps. You have 5 minutes to complete this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Salvage cover
Furniture or similar items

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots, and SCBA. Firefighter trainee will not don face piece or hood.

b. Folds in half again so open edge sides are on top and smoothes over

c. Carries open end of cover to the opposite end, aligns the edges, shakes the wrinkles out and keeps edges straight

d. Grasps the open ends, places them just short of the folded center fold and continues this process by bringing the open ends over to just short of the folded end

e. Completes the operation by making one more fold in the same manner

**Two firefighter spread:**
| a. Clusters furniture together, then stretches the cover along one side of the objects and separates the last half fold |
| b. Makes several accordion folds in the throwing hand |
| c. Pulls the cover tight between the two firefighters and prepares to swing folded part out |
| d. Reaches high with the folded end and pitches it up and over the object |
| e. Straightens the cover and tucks in the edges |
| f. Completes fold and spread in allotted time |

Cleaning and Inspecting Salvage Covers

Subject: Prevention, Preparedness, and Maintenance
Section 101

NFPA 1001 5.5.1
Firefighter I

OBJECTIVE
The firefighter trainee shall demonstrate the procedures for cleaning and inspecting salvage covers. The trainee shall accomplish the skill in 5 minutes or less.

INSTRUCTIONS - procedures for achieving the objective
Given a salvage cover and the appropriate cleaning equipment, you will verbalize the proper technique for inspecting the cover for damage and for cleaning the cover. Actual cleaning does not need to occur for this evaluation. You have 5 minutes to complete this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

FIREFIGHTER I
Subject: Fireground Operations

NFPA 1001 5.3.14  Firefighter I

OBJECTIVE
The firefighter trainee will demonstrate the procedures for debris and water removal while protecting the building contents.

INSTRUCTIONS - procedures for achieving the objective
Given a simulated fire situation, you will demonstrate the procedures for debris and water removal while protecting building contents. You will be required to verbalize key steps while performing this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Pumper apparatus
Salvage covers
Mops
Shovels
Brooms
Buckets
Squeegees
Water vacuums
Portable pump(s)

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots, and SCBA. Firefighter trainee will not don face piece or hood.

Debris Removal:
- a. Locates necessary equipment for debris removal
- b. Has a charged hoseline ready to extinguish any burning debris
- c. After debris is removed from the building, locates material in a suitable location and fashion
- d. Verbally states that caution should be exercised in moving debris in a suspicious fire

Removal and Routing of Water:
- a. Locates necessary equipment
- b. Arranges furnishings to be covered
- c. Properly places salvage cover over contents
- d. Secures the cover(s) so that the water will be channeled away from the contents
- e. Verbally states that the use of a catch-all and water chutes may need to be incorporated in the operation

Subject: Fireground Operations

NFPA 1001 5.3.14                          Firefighter I

OBJECTIVE
The firefighter trainee will select from an assortment of materials provided for covering an opening in a structure. The trainee will properly cover the identified opening to secure the structure.

INSTRUCTIONS - procedures for achieving the objective
You will select the appropriate material(s) from an assortment of materials provided and properly cover the openings to secure the identified structure. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Hammer
Nails, assortment
Plywood
Heavy plastic
Roofing/tar paper
Heavy-duty roofing knife

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers boots and eye protection. Firefighter trainee will not be required to wear SCBA.
The firefighter trainee will select from an assortment of materials provided for covering an opening in a structure. The trainee will properly cover the identified opening to secure the structure.

**Door or window:**
- a. Selects plywood, heavy plastic, or similar material to keep rain out
- b. Uses a sufficient amount of material to cover the opening completely to keep out the elements
- c. Tacks the edges down to close the opening completely

**Roofs:**
- a. Selects plywood, roofing paper, or tar paper
- b. Uses a sufficient amount of material to cover the opening completely to keep out the elements
- c. Uses appropriate nails
- d. Tacks the edges down with laths to secure the roofing/tar paper

**Floors:**
- a. Selects plywood
- b. Uses a sufficient amount of material to cover the opening completely, to keep out the elements
- c. Uses appropriate nails

**NFPA 1001  5.3.1**  Firefighter I

**OBJECTIVE**
The firefighter trainee, wearing full protective clothing, shall properly don a Self-Contained Breathing Apparatus (SCBA) and demonstrate emergency procedures to be used in the event of SCBA system failure. You will have a maximum time limit of 3 minutes to complete the skill.

**INSTRUCTIONS - procedures for achieving the objective**
While wearing full protective clothing, you shall correctly don and place the SCBA into full operation with tank cylinder and main line valves fully opened and by-pass valve closed. You will demonstrate emergency procedures to be used in the event of regulator failure, face piece failure, and conservation of air during emergency procedures. You will have a maximum time limit of 3 minutes to complete the skill. You shall verbalize the mandatory steps while performing this skill. You will begin on my instruction to start. Time will stop when all identified steps have been accomplished and you put your hands in the air to signal that you are finished with this skill. Do you understand these instructions?

**EXAMINERS NOTE**
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

**PREPARATION & EQUIPMENT**
Self-Contained Breathing Apparatus unit

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, coat, boots, hood, gloves, and trousers.

Subject: Fireground Operations

NFPA 1001 5.3.1  Firefighter I

OBJECTIVE
The firefighter trainee, wearing full protective clothing and a Self-Contained Breathing Apparatus (SCBA), shall demonstrate how to conserve air by the technique known as skip-breathing. The trainee will have a maximum time limit of three 3 minutes to complete the skill.

INSTRUCTIONS - procedures for achieving the objective
While wearing full protective clothing and a Self-Contained Breathing Apparatus (SCBA), you will demonstrate emergency procedures for conserving air by using the technique known as skip-breathing. You shall verbalize to the examiner each step identified in bold print as it is performed. You will have a maximum time limit of three 3 minutes to complete the skill. You will begin on my instruction to start. The evaluation will end when all identified steps have been accomplished and you put your hands in the air to signal that you are finished with this skill. Do you understand these instructions?

EXAMINERS NOTE
The SCBA will be in full operational condition with tank cylinder and main line valves fully opened and by-pass valve closed.

The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Self-Contained Breathing Apparatus unit

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, coat, boots, hood, and trousers.
The firefighter trainee, wearing full protective clothing and a Self-Contained Breathing Apparatus (SCBA), shall demonstrate how to conserve air by the technique known as skip-breathing. The trainee will have a maximum time limit of three 3 minutes to complete the skill.

a. Takes a regular breath (safety point: inhales normally)
b. Holds breath for about as long as it would normally take to exhale it
c. Takes a second breath
d. Exhales slowly
e. Completes skill in allotted time

Comments:
Subject: Fireground Operations

NFPA 1001 5.3.1  Firefighter I

OBJECTIVE
The firefighter trainee shall demonstrate the replacement of an expended SCBA air cylinder with a fully charged cylinder. The trainee shall accomplish all of the identified steps in less than 1½ minutes.

INSTRUCTIONS - procedures for achieving the objective
While wearing full protective clothing and having a Self Contained Breathing Apparatus laying on the ground with the cylinder valve open, you shall demonstrate the correct procedures for replacing an expended air cylinder with a fully charged air cylinder. You shall verbalize the mandatory steps while performing this skill. You have 1½ minutes to complete this skill. The skill will begin on my instruction to start. Time will stop when all identified steps have been accomplished and you put your hands in the air to signal that you are finished with this skill. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Self-Contained Breathing Apparatus unit
Fully charged SCBA cylinder (to be used to replace expended cylinder)

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, coat, boots, hood, and trousers. Gloves are to be omitted during the examination.

NFPA 1001 5.3.1 Firefighter I

OBJECTIVE
With SCBA in storage position, the firefighter trainee shall don and doff the breathing apparatus using the Compartment Mounted Method. This skill has a recommended time limit of 1 minute.

INSTRUCTIONS - procedures for achieving the objective
You will demonstrate the procedure for donning and doffing the Self Contained Breathing Apparatus using the Compartment Mounted Method. You shall verbalize the steps printed in either italics or bold italics. You will complete all donning steps in 1 minute or less. Protective ensemble will be properly donned, no skin exposed and collar fastened. You will begin on my instruction to start. Time will stop when all identified steps have been accomplished and you put your hands in the air and signal that you are finished with this skill. Do you understand these instructions?

EXAMINERS NOTE:
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

The trainee will only be timed during the donning portion of this skill. Time will stop when all equipment is donned and the trainee signals completion of the donning steps of the skill.

PREPARATION & EQUIPMENT
Apparatus with SCBA compartment mounting
Self-Contained Breathing Apparatus unit

As required by the Texas Commission on Fire Protection and NFPA 1001, The firefighter trainee shall begin and end wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" to include helmet, coat, boots, hood, trousers, and gloves.

“The firefighter I should already be wearing full protective clothing prior to the beginning of this SCBA-donning procedure. In addition to fully donning and activating the SCBA, the Fire Firghter I should also replace any personal protective clothing (i.e., gloves, protective hood, helmet, etc.) displaced during the donning procedure and activate the PASS device within the specified 1 min time limit.” (NFPA 1001, A-5.3.1)

With SCBA in storage position, the firefighter trainee shall don and doff the breathing apparatus using the Compartment Mounted Method. This skill has a recommended time limit of 1 minute.

The firefighter trainee:

a. Begins procedure with protective ensemble properly donned

b. Checks cylinder gauge, verbalizes PSI

c. Turns the cylinder valve on fully and verbally indicates listening for alarm

d. Properly positions SCBA unit on his/her back

e. Fastens and adjusts straps

f. Dons and secures face piece

g. Checks face piece for proper seal

h. Protective ensemble is properly donned, no skin exposed and collar fastened with helmet chin strap securely fastened under chin

i. Breathing air from the SCBA unit in a positive pressure mode

j. Confirms and verbalizes that PASS device is activated

k. Completes steps a through j within allotted time (1 minute or less)

l. Properly doffs the SCBA

NFPA 1001 5.3.9  Firefighter I

OBJECTIVE
The firefighter trainee, wearing full protective clothing with Self Contained Breathing Apparatus (SCBA), shall demonstrate three different rescues, a firefighter with nonfunctioning respiratory protection, a firefighter with respiratory protection and one civilian. The simulated victims shall weigh between 150-200 pounds, and must be moved a minimum of 20 feet.

INSTRUCTIONS -- procedures for achieving the objective
While wearing full protective clothing and Self Contained Breathing Apparatus (SCBA), you will locate victims weighing between 150-200 pounds. You will locate and move the victims to a designated area. There will be three victims, one victim will simulate a firefighter with functioning SCBA protection, one victim will simulate a firefighter with nonfunctioning SCBA protection, and one will be a civilian. You will verbally state that you have assessed the area for tenability. You must accomplish this skill without compromising your own respiratory protection. You will begin on my instruction to start. The skill will end when you state to me you have finished all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Self-Contained Breathing Apparatus unit

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, hood, gloves, coat, trousers, boots and SCBA.
The firefighter trainee shall demonstrate tying a bowline.

The firefighter trainee, wearing full protective clothing with Self Contained Breathing Apparatus (SCBA), shall demonstrate three different rescues, a firefighter with non-functioning respiratory protection, a firefighter with respiratory protection and one civilian. The simulated victims shall weigh between 150-200 pounds, and must be moved a minimum of 20 feet.

### Rescue of firefighter with respiratory protection:

- a. Verbally states that they have assessed the area for tenability
- b. Does not compromise his/her personal respiratory protection
- c. Properly removes or assists downed firefighter from hazardous area

### Rescue of civilian without respiratory protection

- d. Verbally states that they have assessed the area for tenability
- e. Does not compromise his/her personal respiratory protection
- f. Properly removes or assists down civilian from hazardous area

### Rescue of firefighter whose respiratory protection is not functioning

- g. Verbally states that they have assessed the area for tenability

Subject: Fireground Operations

NFPA 1001 5.3.11, 5.3.12  Firefighter I

OBJECTIVE
The firefighter trainee, given the necessary equipment, shall demonstrate sounding a roof for structural integrity and demonstrate ventilating both pitched and flat roofs.

INSTRUCTIONS: Procedures for achieving the objectives
Standing on the ground near the designated area, you shall climb a ladder to the edge of the roof and use an axe to sound the roof for structural integrity. Using the roof ladder, you shall climb to a designated position on the roof and cut a 4 foot X 4 foot opening at the place indicated. The hole shall be continuously cut until all sides are cut and the cut-out falls to the ground. You will be required to both verbalize key steps and complete mandatory steps while performing this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Roof (may be simulated)
Pick-head axe
14 foot roof ladder
24 foot extension ladder
Extra 4 foot x 8 foot sheets of wood
Ventilation Saw/ Chain Saw, K-12 Saw

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include, helmet, gloves, coat, trousers, boots, hood, and SCBA.

Subject: Fireground Operations  
NFPA 1001 5.3.15  
Firefighter I  

OBJECTIVE  
Connect a fire department pumper to a water supply as a member of a team, given supply or intake hose, hose tools, and a fire hydrant or static water source, so that connections are tight and water flow is unobstructed. (5.3.15)  

INSTRUCTIONS - procedures for achieving the objective  
You shall demonstrate the proper technique for connecting a 2½ inch or larger soft supply hose to a hydrant. Once the hose has been connected to the hydrant and the intake of the apparatus, you will then fully open and close the hydrant. You will be required to complete the mandatory steps while performing this skill. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?  

EXAMINERS NOTE  
The firefighter trainee will not be allowed to review the performance steps at the time of testing.  

PREPARATION & EQUIPMENT  
Pumper apparatus  
2½ or larger soft supply hose  
Hydrant  
Hydrant wrench  

The firefighter trainee shall accomplish the skill wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, and boots.
Instructional Skills - WATER SUPPLY #1
Supply Hose to Hydrant

OBJECTIVE
The firefighter trainee, given the necessary equipment, shall demonstrate drafting from a static water supply source.

INSTRUCTIONS - procedures for achieving the objective
Given all of the necessary equipment, you shall demonstrate the proper technique for drafting from a static water supply source. It will not be necessary for you to actually draft water as a part of this skill. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Pumper apparatus
2 - 2½" or larger hard supply hoses with strainers
Rubber mallet
Portable water tank or a simulated portable water tank

The firefighter trainee shall accomplish the skill wearing gloves, bunker pants, and boots.

PERFORMANCE STANDARD

Subject: Fireground Operations

NFPA 1001 6.3.1 Firefighter II

OBJECTIVE
The firefighter trainee, given the necessary equipment, shall demonstrate the proper procedure for setting up and operating a foam fire stream.

INSTRUCTIONS - procedures for achieving the objective
You shall demonstrate the proper procedure for setting up a foam fire stream with the appropriate equipment. You will demonstrate the operation of the foam stream. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Foam concentrate
Foam eductor
Attack hose line
Nozzle
Pumper apparatus

The firefighter trainee shall accomplish the steps wearing "FULL PROTECTIVE CLOTHING FOR STRUCTURAL FIREFIGHTERS" as required by the Texas Commission on Fire Protection to include helmet, gloves, coat, trousers, boots and SCBA.

The firefighter trainee, given the necessary equipment, shall demonstrate the proper procedure for setting up and operating a foam fire stream.

a. Selects proper foam to be used

b. Checks the eductor and nozzle to make sure they are compatible

c. Ensures the foam concentration matches the eductor percentage rating

d. Adjusts eductor if applicable

e. Attaches eductor to hose of proper size

f. Avoids kinks in the hose

g. Ensures valves on outlets are fully open

h. Attaches attack hose line and nozzle to the discharge end of eductor

i. Opens the foam bucket

j. Places the eductor suction hose into the foam

k. Increases water supply pressure as required by the eductor

EFFECTIVE JANUARY 1, 2013  03RESCUE – 2  FIREFIGHTER II
Subject: Rescue Operations

NFPA 1001 6.4.2 Firefighter II

OBJECTIVE
The firefighter trainee and designated team members shall demonstrate properly raising and lowering a person with a rope rescue system.

INSTRUCTIONS - procedures for achieving the objective
You and designated team members, given appropriate rope rescue equipment, will demonstrate properly raising and lowering a person a minimum of 3 feet, using an approved rope rescue method. You will be required to complete the mandatory steps while performing this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The firefighter trainee will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Various rope rescue equipment suitable for evolution
24 foot ladder or larger

The firefighter trainee shall accomplish the skill wearing a helmet, gloves, trousers, and boots.
Lowering a Victim with a Rope Rescue System

The firefighter trainee and designated team members shall demonstrate properly raising and lowering a person with a rope rescue system.

- a. Selects the appropriate equipment
- b. Inspects the equipment and makes sure the equipment is in good working order
- c. Arranges the equipment properly for the skill (life safety harness or double loop figure-of-eight with a half hitch)
- d. Threads rope through the ladder in preparation for hoisting
- e. Attaches a tag line
- f. Raises and lowers victim at least 3 feet

HAZARDOUS MATERIALS SKILLS MANUAL

CHAPTER SIX

Effective June 1, 2010

Texas Commission on Fire Protection
P.O. Box 2286  Austin, Texas 78768-2286  (512) 936-3838
GENERAL
DOT Emergency Response Guidebook
Skill # 1

PERFORMANCE STANDARD
NFPA 472 4.1.2.2, 4.2.3, 4.4.1
Awareness

OBJECTIVE
Given examples of hazardous materials/WMD incidents, the emergency response plan, the standard operating procedures, and the current edition of the DOT Emergency Response Guidebook, awareness level personnel shall be able to identify the actions to be taken to protect themselves and others and to control access to the scene and shall meet the following requirements:

4.1.2.2 (1)
Analyze the incident to determine both the hazardous material/WMD present and the basic hazard and response information for each hazardous material/WMD agent by completing the required tasks.

4.1.2.2 (2)
Implement actions consistent with the emergency response plan, the standard operating procedures, and the current edition of the DOT Emergency Response Guidebook by completing the required tasks.

4.2.3
Given the identity of various hazardous materials/WMD (name, UN/NA identification number, or type of placard), the awareness level personnel shall identify the fire, explosion, and health hazard information for each material by using the current edition of the DOT Emergency Response Guidebook and shall meet all requirements.

4.4.1
Given examples of hazardous materials/WMD incidents, the emergency response plan, the standard operating procedures, and the current edition of the DOT Emergency Response Guidebook, awareness level personnel shall be able to identify the actions to be taken to protect themselves and others and to control access to the scene and shall meet all requirements.

INSTRUCTIONS - procedures for achieving the objective
Given the most current edition of the Emergency Response Guidebook and a scenario or worksheet, you shall analyze, identify and describe, as may be required, the actions that are appropriate for the safe implementation of awareness level response measures.
TEXAS COMMISSION ON FIRE PROTECTION

Awareness
Performance Standards

You shall respond verbally or in the written form as may be appropriate. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE:
The candidate will not be allowed to review the performance steps at the time of testing.

Coordinators and Instructors: Refer to the example scenario & worksheet attached to this skill for additional guidance.

PREPARATION & EQUIPMENT
Emergency Response Guidebook, most current edition
A written or audio/visual representation of a scene or scenario (i.e. PowerPoint Presentation) or an instructor prepared worksheet.
GENERAL

DOT Emergency Response Guidebook

Emergency Response Guidebook Worksheet Guidelines for Development and Use

- The following worksheet is an example of an instructor designed worksheet that could be used to test a firefighter trainee’s ability to properly use an Emergency Response Guidebook during a Hazardous Materials response. This worksheet has been designed to be completed using the 2008 edition of the Emergency Response Guidebook.
- The use of this worksheet would be suitable for training purposes. However, for skill examination purposes, it is expected that images, placards, UN numbers, and chemical names would be changed.
- This is not a single source solution skills examination evaluation. The development and use of a unique worksheet would be appropriate, acceptable and encouraged.
- Minimum worksheet development guidelines should include the following minimal content items as a general rule:
  - Hazardous Materials identification by UN Number (Yellow Section)
  - Hazardous Materials identification by Chemical Name (Blue Section)
  - Identify the correct
  - The ability to derive information from the Emergency Action Guide pages (Orange Section) including:
    - Potential Fire and Explosion Hazards
    - Potential Health Hazards
    - Protective Clothing Selection
    - Evacuation Considerations
    - Firefighting Measures
    - Spill or Leak recommended control measures
    - Immediate First Aid actions
  - The identification of Isolation Distances and Protective Actions for Non-Toxic Inhalation Hazards (Orange Section)
  - The identification of Initial Isolation Distances and Downwind Protective Distances for Toxic Inhalation Hazards (Green Section)
Using the 2008 Emergency Response Guidebook solve the following problems:

1. What is the initial isolation zone and downwind protective action distance day and night when there is a small leak from the highway cargo tanker pictured here?

2. What is the primary hazard of the product with the ID number UN1824?

3. What type of fire fighting foam should be used on a large spill fire involving the product in this highway cargo tanker? Are there toxic effects associated with this product?

4. What type of protective clothing should be worn to handle a spill involving Hydrofluoric acid, solution?

5. In case of accidental eye contact with methanol, what actions should you take?

6. What are the recommended extinguishing agents for the product with this placard? What is this product?
7. Which **guide number** should be used for the product spilled from the drum in this picture?

**Guide Number:** ________________

8. Identify the **hazards and product name** of this display found on an intermodal container.

________________________________________

________________________________________

9. What is the **recommended evacuation distance** if a truck load of explosives with this placard is involved in a fire?

________________________________________

________________________________________

10. If **Styrene** is exposed to excessive heat, what may occur?

________________________________________

11. What types of extinguishing agents should **not** be applied to fires involving **Perchloric acid UN1802**?

________________________________________

12. What is Protective Clothing and Respiratory Protection recommendation for a response involving **Chloropicrin**?

________________________________________

13. Which guide number should be used for emergency response information for a spill involving material with this placard?

**Guide Number:** ________________

14. What are the emergency response telephone numbers for **CHEMTREC®** and the **NATIONAL RESPONSE CENTER (NRC)**?

**NRC #:** ________________________________

**CHEMTREC#:** __________________________
15. If water is leaking into a cargo hold of a barge containing UN1830, what may occur?

16. Which guide number would you use to find response information about the railcar pictured here?

Guide Number: ____________

17. Which guide number would you use to find response information about the highway cargo tanker pictured here?

Guide Number: ____________

18. If the highway cargo tanker pictured below is involved in a fire, what sights or sounds should cause an immediate withdrawal of emergency response personnel?

19. If a container of the material with this placard is submerged in water, what Toxic-by-Inhalation (TIH) gas may be produced?

20. Is UN1053 a flammable gas? What is its primary hazard, fire or toxicity?
21. If an unconscious person is contaminated with “Boron trifluoride, diethyl etherate” is mouth-to-mouth a recommended first-aid procedure?

**Guide _____**

_________________________________________________________________

_________________________________________________________________

22. Why does “Propadiene, inhibited” have a “P” following the Guide Number in the blue-bordered Section?

_________________________________________________________________

_________________________________________________________________

23. If a large amount of “sulfuryl chloride” is spilled into water, what is the initial isolation distance?

**UN Identification Number ________**

**Initial Isolation distance ________.**

24. What toxic gases may be produced by the reaction between sulfuryl chloride and water?

________________________________________
25. What general safety precautions are recommended by the 2008 North American Emergency Response Guidebook?

1. ________________________________.

2. ________________________________.

3. ________________________________.

4. ________________________________.

5. ________________________________.

6. ________________________________.

7. ________________________________.

8. ________________________________.
PERFORMANCE STANDARD  Section 601

NFPA 472 4.2.1(6)  Awareness

OBJECTIVE
Given examples of containers, awareness level personnel shall be able to recognize typical container shapes that may indicate the possible presence of a hazardous materials/WMD.

4.2.1 (6)
Identify typical container shapes that can indicate the presence of a hazardous materials/WMD.

INSTRUCTIONS - procedures for achieving the objective
Given a scenario, worksheet, or audio/visual presentation you shall identify the type of container represented. You shall respond verbally or in the written form as may be appropriate. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE:
The candidate will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
A worksheet or audio/visual presentation (i.e. PowerPoint Presentation) or an instructor prepared worksheet.
HAZARDOUS MATERIAL AWARENESS SKILL #2 TEST RETEST
Analyzing the Incident

Detecting the Presence of Hazardous Materials/WMD
Identify typical container shapes that can indicate the presence of a hazardous materials/WMD. 4.2.1 (6)

The candidate shall:

a) Identify Non Bulk Containers
   - Dry Goods Container (i.e. Bag or Fiberboard Drum), or
   - Liquid Container (i.e. Steel or Poly Drum), or
   - Pressure Vessel/ Gas Cylinder, or
   - Cryogenic Container (i.e. Dewar), or
   - Radiation Container (Type A or Type B Packaging)

b) Identify Bulk Containers
   - Rail Cars (i.e. Pressure Car, Non Pressure Car, Special Purpose Car), or
   - Road Trailers (i.e. Non Pressure, Corrosive, Dry Bulk Trailers), or
   - Intermodal Containers

c) Identify Fixed Facility Storage Systems (i.e. Above Ground Storage Tanks)

d) Identify Pipeline

e) Identify Ships or Marine Vessels (i.e. Tankers, Cargo Vessels, Barges)

GENERAL
Analyze, Plan, Implement, and Evaluate Response Objectives
Skill #1

PERFORMANCE STANDARD
Section 602
NFPA 472 5.1.2.2 Operations

OBJECTIVE
When responding to hazardous materials/WMD incidents, operations level responders shall be able to perform the following tasks:

(1) Analyze a hazardous materials/WMD incident to determine the scope of the problem and potential outcomes by completing the following tasks:
   (a) Survey a hazardous materials/WMD incident to identify the containers and materials involved, determine whether hazardous materials/WMD have been released, and evaluate the surrounding conditions.
   (b) Collect hazard and response information from MSDS; CHEMTREC/CANUTEC/SETIQ; local, state, and federal authorities; and shipper/manufacturer contacts.
   (c) Predict the likely behavior of a hazardous material/WMD and its container.
   (d) Estimate the potential harm at a hazardous materials/WMD incident.

(2) Plan an initial response to a hazardous materials/WMD incident within the capabilities and competencies of available personnel and personal protective equipment by completing the following tasks:
   (a) Describe the response objectives for the hazardous materials/WMD incident.
   (b) Describe the response options available for each objective.
   (c) Determine whether the personal protective equipment provided is appropriate for implementing each option.
   (d) Describe emergency decontamination procedures.
   (e) Develop a plan of action, including safety considerations.

(3) Implement the planned response for a hazardous materials/WMD incident to favorably change the outcomes consistent with the emergency response plan and/or standard operating procedures by completing the following tasks:
   (a) Establish and enforce scene control procedures, including control zones, emergency decontamination, and communications.
(b) Where criminal or terrorist acts are suspected, establish means of evidence preservation.
(c) Initiate an incident command system (ICS) for hazardous materials/WMD incidents.
(d) Perform tasks assigned as identified in the incident action plan.
(e) Demonstrate emergency decontamination.

(4) Evaluate the progress of the actions taken at a hazardous materials/WMD incident to ensure that the response objectives are being met safely, effectively, and efficiently by completing the following tasks:
(a) Evaluate the status of the actions taken in accomplishing the response objectives.
(b) Communicate the status of the planned response.

INSTRUCTIONS - procedures for achieving the objective
Given a scenario, emergency response and hazardous materials equipment to include reference sources and PPE/CPC, you will implement a planned response to favorably change the outcomes consistent with the local emergency response plan and the organization’s standard operating procedures. You will also evaluate the progress of the actions taken to ensure that the response objectives are being met safely, effectively, and efficiently. You will be operating as part of a team. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The candidate will not be allowed to review the performance steps at the time of testing.

(a) Evaluate the status of the actions taken in accomplishing the response objectives.
(b) Communicate the status of the planned response.

(5.1.2.2) The candidate shall:

(1) Analyze a hazardous materials/WMD incident to determine the scope of the problem and potential outcomes by completing the following tasks:
(a) Survey a hazardous materials/WMD incident to identify the containers and
materials involved, determine whether hazardous materials/WMD have been released, and evaluate the surrounding conditions.

(b) Collect hazard and response information from MSDS; CHEMTREC/CANUTEC/SETIQ; local, state, and federal authorities; and shipper/manufacturer contacts.

(c) Predict the likely behavior of a hazardous material/WMD and its container.

(d) Estimate the potential harm at a hazardous materials/WMD incident.

<table>
<thead>
<tr>
<th>(2) Plan an initial response to a hazardous materials/WMD incident within the capabilities and competencies of available personnel and personal protective equipment by completing the following tasks:</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) Describe the response objectives for the hazardous materials/WMD incident.</td>
</tr>
<tr>
<td>(b) Describe the response options available for each objective.</td>
</tr>
<tr>
<td>(c) Determine whether the personal protective equipment provided is appropriate for implementing each option.</td>
</tr>
<tr>
<td>(d) Describe emergency decontamination procedures.</td>
</tr>
<tr>
<td>(e) Develop a plan of action, including safety considerations.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>(3) Implement the planned response for a hazardous materials/WMD incident to favorably change the outcomes consistent with the emergency response plan and/or standard operating procedures by completing the following tasks:</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) Establish and enforce scene control procedures, including control zones, emergency decontamination, and communications.</td>
</tr>
<tr>
<td>(b) Where criminal or terrorist acts are suspected, establish means of evidence preservation.</td>
</tr>
<tr>
<td>(c) Initiate an incident command system (ICS) for hazardous materials/WMD incidents.</td>
</tr>
</tbody>
</table>
(d) Perform tasks assigned as identified in the incident action plan.

(e) Demonstrate emergency decontamination.

(4) Evaluate the progress of the actions taken at a hazardous materials/WMD incident to ensure that the response objectives are being met safely, effectively, and efficiently by completing the following tasks:

(a) Evaluate the status of the actions taken in accomplishing the response objectives.

(b) Communicate the status of the planned response.

ANALYZING THE INCIDENT
Container Identification

PERFORMANCE STANDARD

NFPA 472 5.2.1, 5.2.1.1.1, 5.2.1.1.2,
5.2.1.1.3, 5.2.1.1.4, 5.2.1.1.5, 5.2.1.1.6

OBJECTIVE
Given scenarios involving hazardous materials/WMD incidents, the operations level responder shall survey the incident to identify the containers and materials involved, determine whether hazardous materials/WMD have been released, and evaluate the surrounding conditions.

Given three examples each of liquid, gas, and solid hazardous material or WMD, including various hazard classes, operations level personnel shall identify the general shapes of containers in which the hazardous materials/WMD are typically found.

Given examples of the following tank cars, the operations level responder shall identify each tank car by type, as follows:
   (1) Cryogenic liquid tank cars
   (2) Nonpressure tank cars (general service or low pressure cars)
   (3) Pressure tank cars

Given examples of the following intermodal tanks, the operations level responder shall identify each intermodal tank by type, as follows:
   (1) Nonpressure intermodal tanks
   (2) Pressure intermodal tanks
   (3) Specialized intermodal tanks, including the following:
       (a) Cryogenic intermodal tanks
       (b) Tube modules

Given examples of the following cargo tanks, the operations level responder shall identify each cargo tank by type, as follows:
   (1) Compressed gas tube trailers
   (2) Corrosive liquid tanks
   (3) Cryogenic liquid tanks
   (4) Dry bulk cargo tanks
   (5) High pressure tanks
   (6) Low pressure chemical tanks
   (7) Nonpressure liquid tanks
Given examples of the following storage tanks, the operations level responder shall identify each tank by type, as follows:
   (1) Cryogenic liquid tank
   (2) Nonpressure tank
   (3) Pressure tank

Given examples of the following nonbulk packaging, the operations level responder shall identify each package by type, as follows:
   (1) Bags
   (2) Carboys
   (3) Cylinders
   (4) Drums
   (5) Dewar flask (cryogenic liquids)

Given examples of the following radioactive material packages, the operations level responder shall identify the characteristics of each container or package by type, as follows:
   (1) Excepted
   (2) Industrial
   (3) Type A
   (4) Type B
   (5) Type C

INSTRUCTIONS - procedures for achieving the objective
You will be presented images or diagrams of various container types and given a worksheet to complete. While doing the images/diagrams complete the worksheet by providing the following information concerning the containers: identify the container by name, by container type, by possible product class, by physical state of the product and any special features/considerations. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The candidate will not be allowed to review the performance steps at the time of testing.
PREPARATION & EQUIPMENT
Several scenarios involving hazardous materials/WMD incidents and diagrams of the different types of containers of hazardous materials/WMD from the list below:

1. Images, diagrams, or multimedia presentation illustrating different types of containers to include:
   a. Highway cargo tanks
   b. Railcar tanks
   c. Intermodal tanks
   d. Fixed facility storage tanks
   e. Non-bulk containers
   f. Radioactive material packages

ANALYZING THE INCIDENT
Identify Pesticide Label
Skill #3

PERFORMANCE STANDARD
Section 602

NFPA 472 5.2.1.3.2 Operations

OBJECTIVE
Given a pesticide label, the operations level responder shall identify each of the following pieces of information, and then match the piece of information to its significance in surveying hazardous materials incidents:

1) Active ingredient
2) Hazard statement
3) Name of pesticide
4) Pest control product (PCP) number (in Canada)
5) Precautionary statement
6) Signal word

INSTRUCTIONS - procedures for achieving the objective
Given a pesticide label and a worksheet, you shall complete the worksheet identifying the following information: 1) the Name of the pesticide, 2) its Active ingredient, 3) the Hazard statement, 4) the EPA registration number or Pest Control Product (PCP) number (in Canada), 5) the Precautionary statement, and 6) the Signal word. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The candidate will not be allowed to review the performance steps at the time of testing.

ANALYZING THE INCIDENT
Collect Hazard and Response Information using MSDS
Skill #4

PERFORMANCE STANDARD
Section 602
NFPA 472 5.2.2 (2), (3) Operations

OBJECTIVE
Given scenarios involving known hazardous materials/WMD, the operations level responder shall collect hazard and response information using MSDS, CHEMTREC/CANUTEC/SETIQ, governmental authorities, and shippers and manufacturers and shall meet the following requirements:

(2) Identify two ways to obtain an MSDS in an emergency.
(3) Using an MSDS for a specified material, identify the following hazard and response information:
   (a) Physical and chemical characteristics
   (b) Physical hazards of the material
   (c) Health hazards of the material
   (d) Signs and symptoms of exposure
   (e) Routes of entry
   (f) Permissible exposure limits
   (g) Responsible party contact
   (h) Precautions for safe handling (including hygiene practices, protective measures, and procedures for cleanup of spills and leaks)
   (i) Applicable control measures, including personal protective equipment
   (j) Emergency and first-aid procedures

INSTRUCTIONS - procedures for achieving the objective
Given a material safety data sheet (MSDS) and a MSDS worksheet, you shall collect the following information and record it on the worksheet:

(a) Physical and chemical characteristics
(b) Physical hazards of the material
(c) Health hazards of the material
(d) Signs and symptoms of exposure
(e) Routes of entry
(f) Permissible exposure limits
(g) Responsible party contact
(h) Precautions for safe handling (including hygiene practices, protective measures, and procedures for cleanup of spills and leaks)
(i) Applicable control measures, including personal protective equipment
(j) Emergency and first-aid procedures

ANALYZING THE INCIDENT
Estimating the Size of an Endangered Area
Skill #5

PERFORMANCE STANDARD
Section 602
NFPA 472 5.2.4 (1), (2) Operations

OBJECTIVE
Given scenarios involving hazardous materials/WMD incidents, the operations level responder shall estimate the potential harm within the endangered area at each incident and shall meet the following requirements:

1. Identify a resource for determining the size of an endangered area of a hazardous materials/WMD incident.
2. Given the dimensions of the endangered area and the surrounding conditions at a hazardous materials/WMD incident, estimate the number and type of exposures within that endangered area.

INSTRUCTIONS - procedures for achieving the objective
Given the most current edition of the *Emergency Response Guidebook*, a map or area description and a scenario involving a hazardous materials incident, you shall identify the size of an endangered area and estimate the number and type of exposures within that endangered area. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The candidate will not be allowed to review the performance steps at the time of testing.

Given scenarios involving hazardous materials/WMD incidents, the operations level responder shall estimate the potential harm within the endangered area at each incident and shall meet the following requirements:

1. Identify a resource for determining the size of an endangered area of a hazardous materials/WMD incident.
2. Given the dimensions of the endangered area and the surrounding conditions at a hazardous materials/WMD incident, estimate the number and type of exposures within that endangered area.

The candidate shall:

a) Using the *Emergency Response Guidebook*, identify the size of the endangered area for the hazardous materials incident in the scenario
b) Estimate the number of people located in the endangered area
c) Identify type of environment (lakes, rivers and streams; urban, rural, etc.)
d) Identify the type of property within the endangered area based on the scenario or map/area provided (schools, hospital, dwellings, nursing homes, etc.)
e) Identify the significance the time of day or weather may play if applicable

IMPLEMENTING THE PLANNED RESPONSE
Establishing Scene Control Zones and Implementing Public Protective Actions
Skill #6

PERFORMANCE STANDARD

NFPA 472 5.4.1 (1), (2), (3), (4), (5), (6) Operations

OBJECTIVE
Given two scenarios involving hazardous materials/WMD incidents, the operations level responder shall identify how to establish and enforce scene control, including control zones and emergency decontamination, and communications between responders and to the public and shall meet the following requirements:

(1) Identify the procedures for establishing scene control through control zones.
(2) Identify the criteria for determining the locations of the control zones at hazardous materials/WMD incidents.
(3) Identify the basic techniques for the following protective actions at hazardous materials/WMD incidents:
   (a) Evacuation
   (b) Sheltering-in-place
(4) Demonstrate the ability to perform emergency decontamination.
(5) Identify the items to be considered in a safety briefing prior to allowing personnel to work at the following:
   (a) Hazardous material incidents
   (b) Hazardous materials/WMD incidents involving criminal activities
(6) Identify the procedures for ensuring coordinated communication between responders and to the public.

INSTRUCTIONS - procedures for achieving the objective
Given a scenario involving a hazardous materials/WMD incident, an Emergency Response Guidebook, and a MSDS, you shall establish scene control zones and implement public protective actions. Additionally, using provided emergency response and hazardous materials response equipment, establish emergency decontamination capability. You must conduct a safety briefing with response personnel and communicate with the public concerning protective actions. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The candidate will not be allowed to review the performance steps at the time of testing. The candidate must participate in at least two scenario evolutions.
PREPARATION & EQUIPMENT
Emergency Response Guidebook
MSDS
Emergency response and hazardous materials response equipment

Given two scenarios involving hazardous materials /WMD incidents, the operations level responder shall identify how to establish and enforce scene control, including control zones and emergency decontamination, and communications between responders and to the public and shall meet the following requirements:

1. Identify the procedures for establishing scene control through control zones.
2. Identify the criteria for determining the locations of the control zones at hazardous materials/WMD incidents.
3. Identify the basic techniques for the following protective actions at hazardous materials/WMD incidents:
   a. Evacuation
   b. Sheltering-in-place
4. Demonstrate the ability to perform emergency decontamination.
5. Identify the items to be considered in a safety briefing prior to allowing personnel to work at the following:
   a. Hazardous material incidents
   b. Hazardous materials/WMD incidents involving criminal activities
6. Identify the procedures for ensuring coordinated communication between responders and to the public.

EVALUATING PROGRESS  
Communicating the Status of the Planned Response  
Skill # 7

PERFORMANCE STANDARD  
Section 602

NFPA 472 5.5.2 (1), (2)  
Operations

OBJECTIVE

Given two scenarios involving hazardous materials/WMD incidents, including the incident action plan, the operations level responder shall communicate the status of the planned response through the normal chain of command and shall meet the following requirements:

(1) Identify the methods for communicating the status of the planned response through the normal chain of command.
(2) Identify the methods for immediate notification of the incident commander and other response personnel about critical emergency conditions at the incident.

INSTRUCTIONS - procedures for achieving the objective

Given scenarios involving hazardous materials/WMD incidents, including the incident action plan; you shall communicate the status of the planned response through the normal chain of command and identify the methods for immediate notification of the incident commander and other response personnel about critical emergency conditions at the incident. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE

The candidate will not be allowed to review the performance steps at the time of testing. The candidate must participate in at least two scenario evolutions.

PREPARATION & EQUIPMENT

Hazardous materials incident scenarios
Standard Operating Procedures per AHJ
### Evaluating Progress - Skill Number #7

Given two scenarios involving hazardous materials/WMD incidents, including the incident action plan, the operations level responder shall communicate the status of the planned response through the normal chain of command and shall meet the following requirements:

1. Identify the methods for communicating the status of the planned response through the normal chain of command.
2. Identify the methods for immediate notification of the incident commander and other response personnel about critical emergency conditions at the incident.

#### The candidate shall:

- **Verbally identifies the methods for communicating the status of the planned response to the incident commander through the normal chain of command**
- **Verbally identifies the methods for immediate notification of the incident commander and other response personnel about critical emergency conditions at the incident**

Implementing the Planned Response
Donning, Working in, and Doffing Personal Protective Equipment

Skill #1

PERFORMANCE STANDARD
NFPA 472 6.2.1.2(1), (3); 6.2.4.1 (1), (2), (3), (5); Operations-Mission Specific 6.2.5.1

OBJECTIVE

6.2.1.2 The goal of the competencies in this section shall be to provide the operations level responder assigned to use personal protective equipment with the knowledge and skills to perform the following tasks safely and effectively:

1) Plan a response within the capabilities of personal protective equipment provided by the AHJ in order to perform mission specific tasks assigned.
2) Terminate the incident by completing the reports and documentation pertaining to personal protective equipment.

6.2.4.1 Given the personal protective equipment provided by the AHJ, the operations level responder assigned to use personal protective equipment shall demonstrate the ability to don, work in, and doff the equipment provided to support mission-specific tasks and shall meet the following requirements:

1) Describe at least three safety procedures for personnel wearing protective clothing.
2) Describe at least three emergency procedures for personnel wearing protective clothing.
3) Demonstrate the ability to don, work in, and doff personal protective equipment provided by the AHJ.
4) Describe the maintenance, testing, inspection, storage, and documentation procedures for personal protective equipment provided by the AHJ according to the manufacturer's specifications and recommendations.

6.2.5.1 Given a scenario involving a hazardous materials/WMD incident, the operations level responder assigned to use personal protective equipment shall identify and complete the reporting and documentation requirements consistent with the emergency response plan or standard operating procedures regarding personal protective equipment.
INSTRUCTIONS - procedures for achieving the objective
Given the personal protective equipment provided by the AHJ, you shall perform the following tasks:

1. Describe at least three safety procedures for personnel wearing protective clothing.
2. Describe at least three emergency procedures for personnel wearing protective clothing.
3. Demonstrate the ability to don, work in, and doff personal protective equipment provided by the AHJ.
4. Describe the maintenance, testing, inspection, storage, and documentation procedures for personal protective equipment provided by the AHJ according to the manufacturer's specifications and recommendations.

You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The candidate will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Personal protective equipment provided by the AHJ
Structural firefighter protective clothing
Splash protective chemical clothing/equipment
Vapor protective clothing/equipment (AHJ)
Positive pressure self contained breathing apparatus
Air purifying respirators (AHJ)
Supplied air respirators (AHJ)

Planning the Response
Identifying Product Control Options

Skill #3

PERFORMANCE STANDARD

NFPA 472 6.6.3.1 (1), (2); 6.6.1.2.2 (1) Operations-Mission Specific

OBJECTIVE

Given examples of hazardous materials/WMD incidents, the operations level responder assigned to perform product control shall identify the options for each response objective and shall meet the following requirements as prescribed by the AHJ:

1. Identify the options to accomplish a given response objective.
2. Identify the purpose for and the procedures, equipment, and safety precautions associated with each of the following control techniques:
   - Absorption
   - Adsorption
   - Damming
   - Diking
   - Dilution
   - Diversion
   - Remote valve shutoff
   - Retention
   - Vapor dispersion
   - Vapor suppression

When responding to hazardous materials/WMD incidents, the operations level responder assigned to perform product control shall be able to perform the following tasks:

1. Plan an initial response within the capabilities and competencies of available personnel, personal protective equipment, and control equipment and in accordance with the emergency response plan or standard operating procedures by completing the following tasks:
   a. Describe the control options available to the operations level responder.
   b. Describe the control options available for flammable liquid and flammable gas incidents.

INSTRUCTIONS - procedures for achieving the objective

I will give you examples of hazardous materials/WMD incidents; you shall identify the options for product control for each response objective according to the following requirements as prescribed by the AHJ:
(1) Identify the options to accomplish a given response objective.
(2) Identify the purpose for and the procedures, equipment, and safety precautions associated with each of the following control techniques:
   (a) Absorption
   (b) Adsorption
   (c) Damming
   (d) Diking
   (e) Dilution
   (f) Diversion
   (g) Remote valve shutoff
   (h) Retention
   (i) Vapor dispersion
   (j) Vapor suppression

(3) Plan an initial response within the capabilities and competencies of available personnel, personal protective equipment, and control equipment and in accordance with the emergency response plan or standard operating procedures by completing the following tasks:
   (a) Describe the control options available to the operations level responder.
   (b) Describe the control options available for flammable liquid and flammable gas incidents.

Given a hazardous materials incident scenario you will identify the most appropriate method or methods to safely control the release in a defensive fashion. Additionally, describe the procedures, equipment, and safety precautions required to perform those procedures. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The candidate will not be allowed to review the performance steps at the time of testing.

IMPLEMENTING THE PLANNED RESPONSE
Implementing Product Control Options – Foam Operations
Skill # 4

PERFORMANCE STANDARD
Section 603

NFPA 472 6.6.4.1(1), (2) Operations-Mission Specific

OBJECTIVE
Given an incident action plan for a hazardous materials/WMD incident, within the capabilities and equipment provided by the AHJ, the operations level responder assigned to perform product control shall demonstrate control functions set out in the plan and shall meet the following requirements as prescribed by the AHJ:

(1) Using the type of special purpose or hazard suppressing foams or agents and foam equipment furnished by the AHJ, demonstrate the application of the foam(s) or agent(s) on a spill or fire involving hazardous materials/WMD.
(2) Identify the characteristics and applicability of the following Class B foams if supplied by the AHJ:
   (a) Aqueous film-forming foam (AFFF)
   (b) Alcohol-resistant concentrates
   (c) Fluoroprotein
   (d) High-expansion foam

INSTRUCTIONS - procedures for achieving the objective
Given firefighting foam or training foam and foam generating equipment, develop and apply firefighting foam or foam agents to a spill or fire involving hazardous materials. You will be operating as part of a team and be responsible for maintaining a safe operational environment at all times. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The candidate will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT
Firefighting foam or training foam provided by the AHJ
Foam agents (i.e. Microblaze) provided by the AHJ if applicable
Foam generation equipment (i.e. pumping apparatus, hose, foam eductors, nozzles, expansion tubes, etc.)

OBJECTIVE

Given an incident action plan for a hazardous materials/WMD incident, within the capabilities and equipment provided by the AHJ, the operations level responder assigned to perform product control shall demonstrate control functions set out in the plan and shall meet the following requirements as prescribed by the AHJ:

(4) Identify the location and describe the use of emergency remote shutoff devices on MC/DOT-306/406, MC/DOT-307/407, and MC-331 cargo tanks containing flammable liquids or gases.

INSTRUCTIONS - procedures for achieving the objective

Given diagrams or images of MC-306/DOT-406, MC-307/DOT-407 and MC-331 cargo tanks you shall identify the location and describe the use of the mechanical, hydraulic, and air emergency remote shutoff devices on each of the cargo tanks. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE

The candidate will not be allowed to review the performance steps at the time of testing.

PREPARATION & EQUIPMENT

Images or diagrams of:
1. MC-306/DOT-406 (Nonpressure) cargo tanks and remote shut-off devices
2. MC-307/DOT-407 (Low pressure) cargo tanks and remote shut-off devices
3. MC-331 (High pressure) cargo tanks and remote shut-off devices

PERFORMANCE STANDARD

NFPA 472 6.6.4.1(5) Operations-Mission Specific

OBJECTIVE
Given an incident action plan for a hazardous materials/WMD incident, within the capabilities and equipment provided by the AHJ, the operations level responder assigned to perform product control shall demonstrate control functions set out in the plan and shall meet the following requirements as prescribed by the AHJ:

(5) Describe the use of emergency remote shutoff devices at fixed facilities.

INSTRUCTIONS - procedures for achieving the objective
Given a diagram of a fixed facility remote shut-off device, describe its operation and use. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

EXAMINERS NOTE
The candidate will not be allowed to review the performance steps at the time of testing.
