

FIRE INVESTIGATOR

SKILLS MANUAL

CHAPTER FIVE

NFPA 1033 – 2014 Edition

Effective January 1, 2015

Texas Commission on Fire Protection
P.O. Box 2286 Austin, Texas 78768-2286 (512) 936-3838

INSTRUCTION SHEET

FIRE INVESTIGATOR PERFORMANCE SKILLS

Format

Each skill contains its own skill sheet, is evaluated independently, and is based on the JPRs in National Fire Protection Association (NFPA) 1033, *Standard for Professional Qualifications for Fire Investigator*, 2014 edition.

For skill sheets that do not contain time constraints, the Course Instructor should specify time constraints as necessary.

Scoring Method

The scoring method is satisfactory (S) or unsatisfactory (U) for each step of the skill objective, and a Pass or Fail for each individual skill section. In order to successfully pass an individual skill section, the Fire Investigator candidate must receive satisfactory scores in all the steps of the skill objective. In order to receive an overall Pass on the skill sheet, the Fire Investigator candidate must receive a passing score for all individual skill sections.

Any unsatisfactory or individual skill failure shall require the examiner to explain the reason for the failure in written form in the comments section of the skill sheet.

Preparation and Equipment

For optimal learning, scenario based training and role-playing is recommended; however, based on departmental needs certain activities may be simulated by other means.

Fire Investigator Skills

Subject	Skill No.	Functional Name	NFPA 1033 #
Scene Examination	1	Securing the Fire Ground	4.2.1
Scene Examination	2	Conducting an Exterior Survey	4.2.2
Scene Examination	3	Conducting an Interior Survey	4.2.3
Scene Examination	4	Interpret Fire Patterns in a Vehicle	4.2.4
Scene Examination	5	Interpret and Analyze Fire Patterns	4.2.4, 4.2.5
Scene Examination	6	Examining and Removing Fire Debris	4.2.6, 4.2.9
Scene Examination	7	Reconstructing the Area of Origin	4.2.7
Scene Examination	8	Inspecting the Performance of Building Systems	4.2.8
Documenting the Scene	9	Diagramming the Scene	4.3.1
Documenting the Scene	10	Photographically Documenting the Scene	4.3.2
Documenting the Scene	11	Constructing Investigative Notes	4.3.3
Evidence Collection/Preservation	12	Utilizing Proper Procedures for Managing Victims and Fatalities	4.4.1, 4.4.2, 4.4.3
Evidence Collection/Preservation	13	Maintaining a Chain of Custody	4.4.4
Evidence Collection/Preservation	14	Disposing of Evidence	4.4.5
Interview	15	Developing an Interview Plan	4.5.1
Interview	16	Conducting Interviews	4.5.2
Interview	17	Evaluating Interview Information	4.5.3
Post-Incident Investigation	18	Gathering Reports and Records	4.6.1
Post-Incident Investigation	19	Evaluating the Investigative File	4.6.2
Post-Incident Investigation	20	Coordinating Expert Resources	4.6.3
Post-Incident Investigation	21	Establishing Evidence as to Motive and/or Opportunity - Incendiary Fire	4.6.4
Post-Incident Investigation	22	Formulating an Opinion of the Person(s) and/or Product(s) Responsible for the Fire	4.6.5
Presentations	23	Preparing a Written Investigation Report	4.7.1
Presentations	24	Verbally Expressing Investigative Findings	4.7.2
Presentations	25	Testifying During Legal Proceedings	4.7.3

Fire Investigator Skills Equipment List

Fire ground (actual or simulated)

- Structure
- Video
- PowerPoint
- Slides
- With evidence of an explosion
- Simulated victim or fatality
- Vehicle
- Building systems

Six items of potential evidence

Burned items

Protective clothing (Appropriate safety equipment)

- Boots
- Gloves
- Hard hat
- Safety glasses
- SCBA (if IDLH atmosphere)

Standard equipment and tools

Model evidence policy

Marking devices

Evidence collection containers

Evidence tags or labels

Chain of custody forms

Evidence disposal forms

Incendiary investigation file including:

- Incident information
- Interview Information
- Photos
- Suppression report
- Conflicting information
- Expert witness backgrounds
- Competencies
- Fee schedules
- Authorization from the prosecutor to include the candidate's opinion in the report

Witness statements

Standard crime lab analysis form

Floor plan map

Pre fire plans

Inspection reports

Fire report (TEXFIRS)

Fire scene tape

Measuring device

Pencil/pen

Note pad

Photo log

Camera with flash, and accessories

- 35 mm
- Digital
- Film

Interview room setting

Interview forms

Interview transcripts

DOT *Emergency Response Guidebook*, current edition

Various placards

Scenario involving identified hazardous materials

Additional personnel if needed

TEXAS COMMISSION ON FIRE PROTECTION

Fire Investigator

Performance Standards Evaluation

Skill Number 1

Securing the Fire Ground

Subject: Scene Examination

NFPA 1033, 2014 edition, 4.2.1

Fire Investigator

OBJECTIVE

Secure the fire ground, given marking devices, sufficient personnel, and special tools and equipment, so that unauthorized persons can recognize the perimeters of the investigative scene and are kept from restricted areas and all evidence or potential evidence is protected from damage or destruction. (4.2.1)

INSTRUCTIONS - procedures for achieving the objective

The Investigator candidate shall secure the fire ground to protect evidence and restrict access.

EXAMINER'S NOTE

The Investigator candidate will not be allowed to review the performance steps at the time of testing.

The fire ground scene may be physically simulated; however, the investigator candidate must perform each step of the required skill in the presence of the field examiner.

PREPARATION & EQUIPMENT

Fire ground (actual or simulated)

Marking devices

Appropriate safety equipment

Skill Number 1				
Secure the fire ground, given marking devices, sufficient personnel, and special tools and equipment, so that unauthorized persons can recognize the perimeters of the investigative scene and are kept from restricted areas and all evidence or potential evidence is protected from damage or destruction. (1033-4.2.1)				
a) Located general area of fire origin				
b) Marked items of potential evidence				
c) Verbally described the importance of fire scene security				
d) Placed scene restriction marking devices around the origin area and/or potential evidence items				
e) Verbally described evidence preservation				
f) Verbally described issues relating to spoliation				
g) Prevented unauthorized entry				
h) Performed skill in a safe and proficient manner				

S = Satisfactorily completed/performed

U = Unsatisfactorily performed/failed to meet objective or grading step

All steps of the skill objective are mandatory and must be scored as “Satisfactory” to pass the skill.

TEXAS COMMISSION ON FIRE PROTECTION
Fire Investigator
Performance Standards Evaluation

Skill Number 2
Conducting an Exterior Survey

Subject: Scene Examination

NFPA 1033, 2014 edition, 4.2.2

Fire Investigator

OBJECTIVE

Conduct an exterior survey, given standard equipment and tools, so that evidence is identified and preserved, fire damage is interpreted, hazards are identified to avoid injuries, accessibility to the property is determined, and all potential means of ingress and egress are discovered. (4.2.2)

INSTRUCTIONS - procedures for achieving the objective

The Investigator candidate, while keeping safety in mind, shall conduct a 360-degree exterior survey of the scene. The Investigator candidate shall identify entry/exit points, items of potential evidence, and post fire indicators.

EXAMINER'S NOTE

The Investigator candidate will not be allowed to review the performance steps at the time of testing.

The fire ground scene may be physically simulated; however, the investigator candidate must perform each step of the required skill in the presence of the field examiner.

Skill Number 3
Conducting an Interior Survey

Subject: Scene Examination

NFPA 1033, 2014 edition, 4.2.3

Fire Investigator

OBJECTIVE

Conduct an interior survey, given standard equipment and tools, so that areas of potential evidentiary value requiring further examination are identified and preserved, the evidentiary value of contents is determined, and hazards are identified in order to avoid injuries. (4.2.3)

INSTRUCTIONS - procedures for achieving the objective

The Investigator candidate, while keeping safety in mind, shall conduct a 360-degree interior survey of the fire scene. The Investigator candidate shall identify entry/exit points, items of potential evidence, and post fire indicators.

EXAMINER'S NOTE

The Investigator candidate will not be allowed to review the performance steps at the time of testing.

The fire ground scene may be physically simulated; however, the investigator candidate must perform each step of the required skill in the presence of the field examiner.

TEXAS COMMISSION ON FIRE PROTECTION
Fire Investigator
Performance Standards Evaluation

Skill Number 4
Interpret Fire Patterns in a Vehicle

Subject: Scene Examination

NFPA 1033, 2014 edition, 4.2.4

Fire Investigator

OBJECTIVE

Interpret fire patterns, given standard equipment and tools and some structural or content remains, so that each individual pattern is evaluated with respect to the burning characteristics of the material involved and in context and relationship with all patterns observed and the mechanisms of heat transfer that led to the formation of the pattern. (4.2.4)

INSTRUCTIONS - procedures for achieving the objective

The Investigator candidate shall observe a vehicle fire scene and interpret fire patterns, given standard equipment and tools and a vehicle, so that each individual pattern is evaluated with respect to the burning characteristics of the material involved.

EXAMINER'S NOTE

The Investigator candidate will not be allowed to review the performance steps at the time of testing.

The fire ground scene may be physically simulated; however, the investigator candidate must perform each step of the required skill in the presence of the field examiner.

(4.2.4)				
a) Interpreted and documented fire patterns and heat transfer mechanisms on different types of materials				
b) Determined an area of origin in or near the vehicle				
c) Examined the engine compartment, the passenger compartment or interior, and the cargo compartment				
d) Interpreted and documented signs of fire development				
e) Performed skill in a safe and proficient manner				

S = Satisfactorily completed/performed

U = Unsatisfactorily performed/failed to meet objective or grading step

Fire Investigator

Performance Standards Evaluation

Skill Number 5

Interpret and Analyze Fire Patterns

Subject: Scene Examination

NFPA 1033, 2014 edition, 4.2.4, 4.2.5

Fire Investigator

OBJECTIVE

Interpret fire patterns, given standard equipment and tools and some structural or content remains, so that each individual pattern is evaluated with respect to the burning characteristics of the material involved and in context and relationship with all patterns observed and the mechanisms of heat transfer that led to the formation of the pattern. (4.2.4)

Interpret and analyze fire patterns, given standard equipment and tools and some structural or content remains, so that fire development is determined, methods and effects of suppression are evaluated, false origin area patterns are recognized, and all areas of origin are correctly identified. (4.2.5)

INSTRUCTIONS - procedures for achieving the objective

The Investigator candidate shall observe a fire scene and interpret and analyze fire patterns, given standard equipment and tools and some structural or content remains, so that fire development is determined, methods and effects of suppression are evaluated, false origin area patterns are recognized, and all areas of origin are correctly identified. Also, each individual pattern is evaluated with respect to the burning characteristics of the material involved.

EXAMINER'S NOTE

The Investigator candidate will not be allowed to review the performance steps at the time of testing.

The fire ground scene may be physically simulated; however, the investigator candidate must perform each step of the required skill in the presence of the field examiner.

TEXAS COMMISSION ON FIRE PROTECTION

Fire Investigator

Performance Standards Evaluation

Skill Number 6

Examining and Removing Fire Debris

Subject: Scene Examination

NFPA 1033, 2014 edition, 4.2.6, 4.2.9

Fire Investigator

OBJECTIVE

Examine and remove fire debris, given standard equipment and tools, so that all debris is checked for fire cause evidence, potential ignition source(s) is identified, and evidence is preserved without investigator-inflicted damage or contamination. (4.2.6)

Discriminate the effects of explosions from other types of damage, given standard equipment and tools, so that an explosion is identified and its evidence is preserved. (4.2.9)

INSTRUCTIONS - procedures for achieving the objective

The Investigator candidate shall, while wearing proper PPE, examine and remove fire debris from a scene. The Investigator candidate shall check all of the debris and the surrounding area for fire cause evidence, including evidence of an explosion. The Investigator candidate shall identify the ignition source(s), determine the cause of the fire, and preserve all evidence properly.

EXAMINER'S NOTE

The Investigator candidate will not be allowed to review the performance steps at the time of testing. Evidence of an explosion must be included so that the candidate's ability to discriminate the effects of an explosion, identify the explosion, and preserve the evidence of the explosion can all be evaluated. Evidence of an explosion might actually be in the debris or surrounding materials at a scene, or it could be photographic evidence presented from a case file.

The fire ground scene may be physically simulated; however, the investigator candidate must perform each step of the required skill in the presence of the field examiner.

PREPARATION & EQUIPMENT

Fire ground with evidence of an explosion (actual or simulated)

Standard equipment and tools

Evidence collection containers

Appropriate safety equipment

TEXAS COMMISSION ON FIRE PROTECTION

Fire Investigator

Performance Standards Evaluation

Skill Number 7

Reconstructing the Area of Origin

Subject: Scene Examination

NFPA 1033, 2014 edition, 4.2.7

Fire Investigator

OBJECTIVE

Reconstruct the area of origin, given standard and, if needed, special equipment and tools as well as sufficient personnel, so that all protected areas and fire patterns are identified and correlated to contents or structural remains, items potentially critical to cause determination and photo documentation are returned to their prefire location, and the area(s) or point(s) of origin is discovered. (4.2.7)

INSTRUCTIONS - procedures for achieving the objective

The Investigator candidate shall identify protected areas, locate and replace items moved during fire suppression activities to their pre-fire location, and indicate on a photo log what photos should be taken to document reconstruction.

EXAMINER'S NOTE

The Investigator candidate will not be allowed to review the performance steps at the time of testing.

The fire ground scene may be physically simulated; however, the investigator candidate must perform each step of the required skill in the presence of the field examiner.

TEXAS COMMISSION ON FIRE PROTECTION

Fire Investigator

Performance Standards Evaluation

Skill Number 8

Inspecting the Performance of Building Systems

Subject: Scene Examination

NFPA 1033, 2014 edition, 4.2.8

Fire Investigator

OBJECTIVE

Inspect the performance of building systems, including detection, suppression, HVAC, utilities, and building compartmentation, given standard and special equipment and tools, so that a determination can be made as to the need for expert resources, an operating system's impact on fire growth and spread is considered in identifying origin areas, defeated and/or failed systems are identified, and the system's potential as a fire cause is recognized. (4.2.8)

INSTRUCTIONS - procedures for achieving the objective

The Investigator candidate shall perform a post-fire inspection of a scene and indicate on a floor plan the location and condition of each of the following: detection systems, HVAC, utilities, and suppression systems. The Investigator candidate shall identify which expert resources, if any, would be needed to confirm that any of the systems were found defective or defeated.

EXAMINER'S NOTE

The Investigator candidate will not be allowed to review the performance steps at the time of testing.

The fire ground scene may be physically simulated; however, the investigator candidate must perform each step of the required skill in the presence of the field examiner.

Inspect the performance of building systems, including detection, suppression, HVAC, utilities, and building compartmentation, given standard and special equipment and tools, so that a determination can be made as to the need for expert resources, an operating system's impact on fire growth and spread is considered in identifying origin areas, defeated and/or failed systems are identified, and the system's potential as a fire cause is recognized. (1033-4.2.8)				
a) Identified and inspected exterior utilities				
b) Located and inspected detection systems				
c) Located and inspected HVAC systems				
d) Located and inspected suppression systems				
e) Reported which, if any, expert resources would be needed				
f) Reported which, if any and how systems inspected were defective or defeated				
g) Documented the building systems effect on the fire and fire suppression efforts on building systems				
h) Performed skill in a safe and proficient manner				

S = Satisfactorily completed/performed

U = Unsatisfactorily performed/failed to meet objective or grading step

All steps of the skill objective are mandatory and must be scored as "Satisfactory" to pass the skill.

Skill Number 9
Diagramming the Scene

Subject: Documenting the Scene

NFPA 1033, 2014 edition, 4.3.1

Fire Investigator

OBJECTIVE

Diagram the scene, given standard tools and equipment, so that the scene is accurately represented and evidence, pertinent contents, significant patterns, and area(s) or point(s) of origin are identified. (4.3.1)

INSTRUCTIONS - procedures for achieving the objective

The Investigator candidate shall diagram (rough sketch) the fire scene. Diagram shall include at least one item of evidence, one item of pertinent contents, one significant fire pattern, and one area or point of origin.

EXAMINER'S NOTE

The Investigator candidate will not be allowed to review the performance steps at the time of testing.

The fire ground scene may be physically simulated; however, the investigator candidate must perform each step of the required skill in the presence of the field examiner.

PREPARATION & EQUIPMENT

Safe and secure fire ground (actual or simulated)

Note pad

Measuring devices

An assistant if requested

Appropriate safety equipment

Standard equipment and tools

Skill Number 12

Utilizing Proper Procedures for Managing Victims and Fatalities

Subject: Evidence Collection/Preservation

NFPA 1033, 2014 edition, 4.4.1, 4.4.2, 4.4.3

Fire Investigator

OBJECTIVE

Utilize proper procedures for managing victims and fatalities, given a protocol and appropriate personnel, so that all evidence is discovered and preserved and the protocol procedures are followed. (4.4.1)

Locate, document, collect, label, package and store evidence, given standard or special tools and equipment and evidence collection materials, so that it is properly identified, preserved, collected, packaged and stored for use in testing, legal, or other proceedings and examinations, ensuring cross-contamination and investigator-inflicted damage to evidentiary items is avoided and the chain of custody is established. (4.4.2)

Select evidence for analysis given all information from the investigation, so that items for analysis support specific investigation needs. (4.4.3)

INSTRUCTIONS - procedures for achieving the objective

The Investigator candidate shall follow procedures to manage victims **AND** fatalities and to discover and preserve **ALL** evidence. The Investigator candidate shall then collect and package two different types of identified evidence, fill out a standard crime lab analysis request form indicating specific test(s) requested, while maintaining chain of custody and avoiding contamination.

EXAMINER'S NOTE

The Investigator candidate will not be allowed to review the performance steps at the time of testing.

The fire ground scene may be physically simulated; however, the investigator candidate must perform each step of the required skill in the presence of the field examiner.
